Sri Vasavi Institute of Engineering and Technology

Computer Science and Engineering

Part A : Institutional Information

1 Name and Address of the Institution

Sri Vasavi Institute of Engineering and Technology,
Nandamuru, Pedana Mandal, Krishna District., Andhra Pradesh - 521369.

2 Name and Address of Affiliating University

JNTUK Kakinada

3 Year of establishment of the Institution:

2008

4 Type of the Institution:

☐ University	☐ Autonomous
☐ Deemed University	☑ Affiliated
☐ Government Aided	

5 Ownership Status:

☐ Central Government	☐ Trust
☐ State Government	☑ Society
☐ Government Aided	☐ Section 25 Company
☑ Self financing	☐ Any Other(Please Specify)

11 Vision of the Institution:

To emerge as a premier engineering institution in rural India imparting values based education for the socio-economic upliftment.

12 Mission of the Institution:

IM1: Provide the most creative learning environment for Technical Excellence of stakeholders

IM2 : Promote industry-institute interaction for skill enhancement and to meet the industry needs

IM3 : Create an environment to the stakeholders to be good citizens with integrity and morality.

IM4 : Committed to improve technial excellence, ethical values continuously.

1.4 State the process for defining the Vision and Mission of the Department, and PEOs of the program (25) Total Marks 25.00

Institute Marks : 25.00

A. Description of process involved in defining the Vision, Mission of the Department (10)

Formulated statements of Vision, Mission and PEOs of the undergraduate Program in Computer Science and Engineering department are a result of rigorous discussions amongst the internal stakeholders and feedback of the program. The Vision emphasizes on the all-round development of the students which will help them to become a successful engineer. The Mission statement focuses on the on-going academic processes which accomplish the Vision in long term. PEO statements are the core objectives on fulfilment of which it can be stated with assurance that department's Mission and Vision will be achieved.

Steps involved in drafting the departments' Vision and Mission:

Step 1: Institute's Vision and Mission is taken as the basis.

Step 2: PAC (Program Assessment Committee) addresses the major goals of the department, on basis of which initial draft of the Vision and Mission statements are prepared.

Step 3: The statements are circulated among the faculty members, students, alumni and employers. Necessary modifications are made by incorporating the suggestions.

step 4:The draft is presented in DAC (Department Advisory Committee) meeting to check for consistency with institute's Vision and Mission and send to CAC..

Step 4: The draft is presented in CAC (College Academic Committee) and once approved ,thereafter the finalized statements are documented.

The process involved in defining the Vision, Mission of the Department

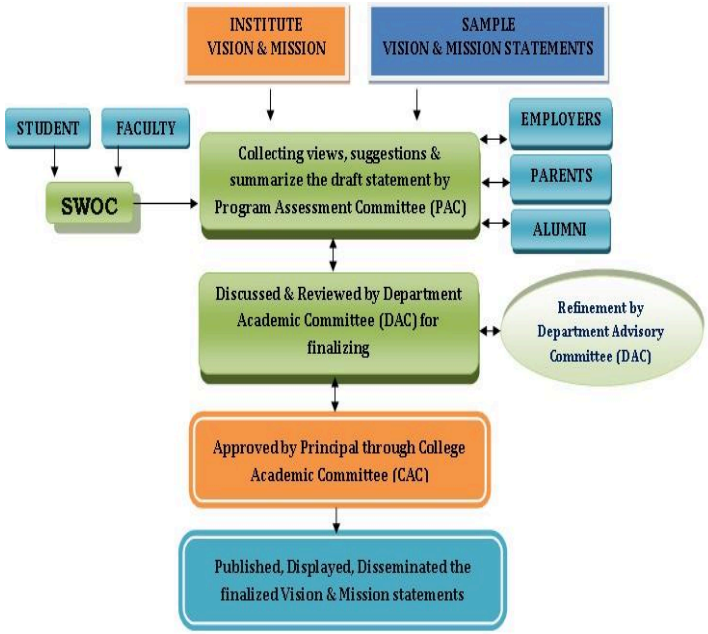

Figure: 1.4.1 Flowchart representing the process for defining Department Mission, Vision

B. Description of process involved in defining the PEOs of the program (15)

Steps involved in drafting the Program Educational Objectives of the department:

Step 1: The Mission of the Department is taken as the basis for defining the PEOs.

Step 2: PAC addresses the changing needs of the industry and society in a set of discussions and prepared the first draft of the PEOs.

Step 3: Feedback of the stakeholders such as Students, Alumni and Employers are taken into account to make modification in the first suggested draft of the PEOs.

Step 4: The re-structured draft of the PEOs is thereafter discussed and reviewed among the faculty members in the Department Academic Committee (DAC) Meeting.

Step 5: The PEOs are sent to CAC ,once approved thereafter the finalized statements are documented.

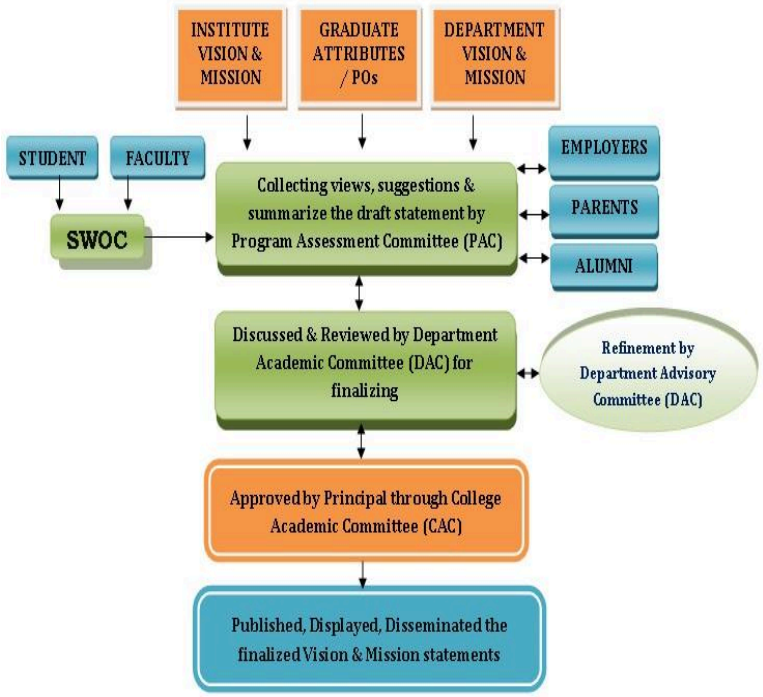

Figure: 1.4.2 Flowchart representing the process for defining Department PEOs

1.5 Establish consistency of PEOs with Mission of the Department (15) Total Marks 15.00

Institute Marks : 15.00

A. Preparation of a matrix of PEOs and elements of Mission statement (5)

Program Educational Objectives

PEO1: Exhibit strong foundation in Mathematics, Science and Computer Engineering fundamentals to solve Engineering problems as per industry needs.

PEO2: Apply recent technological developments to contribute effectively for research activities.

PEO3: Inculcate multidisciplinary approach, professional attitude and ethics, communication and teamwork skills, and ability to relate computer engineering issues with social awareness.

PEO4: Adapt technological advancements by continuous learning.

Mission of CSE Department

DM1: To provide knowledge and skills required for industry.

DM2: To conduct training and activities with stake holder involvement

DM3: To provide a learning ambience for enhancing innovation, professional and interpersonal skills

B. Consistency/justification of co-relation parameters of the above matrix (10)

PEO#	DM1	DM2	DM3	Justification
PEO-1 (Strong domain knowledge)	3	2	2	**DM1**: Strongly supported by PEO1 as the ability to solve engineering problems as per industry needs **DM2**: Moderately support by PEO1 as it is not practically possible to satisfy industry needs without their involvement and training activities **DM3**: Moderately support by PEO1 as creating learning ambience in that domain to solve problems as per industry needs.
PEO-2 (Innovative thinking)	3	3	2	**DM1**:Strongly support by PEO2 as innovative thinking for enhancing the knowledge and skills required for industry **DM2**: Strongly support by PEO2 as the ability to solve engineering problems by innovations and problem solving skills **DM3**:Moderately support by PEO2 as without learning ambience it is difficult to perform research activities
PEO-3 (Inter personnel skills and ethics)	2	2	3	**DM1**:Moderately support by PEO3 as communication and ethics are part of industrial needs **DM2**: Moderately support by PEO3 as Inter personnel skills are required to conduct various training activities with stake holders' involvement. **DM3**: Strongly support by PEO3 as the professional and inter personnel skills achieved through the proper guidance of faculty

PEO-4 (Lifelong learning)	2	2	3	**DM1**: Moderately support byPEO4 as changes are needed in industry advanced technologies are required by using cutting edge tolls and technologies **DM2**: Moderately support by PEO4 as Technological advancements leads to conduct various training activities with stakeholders involvement. **DM3**: Strongly support by PEO3 as both are correlated each other

PEO Statements	M1	M2	M3
Exhibit strong foundation in Mathematics, Science and Computer Engineering fundamentals to solve Engineering problems as per industry needs.	3	2	2
Apply recent technological developments to contribute effectively for research activities.	3	3	2
Inculcate multidisciplinary approach, professional attitude and ethics, communication and teamwork skills, and ability to relate computer engineering issues with social awareness.	2	2	3
Adapt technological advancements by continuous learning.	2	2	3

2 PROGRAM CURRICULUM AND TEACHING - LEARNING PROCESSES (120)

Total Marks 120.00

2.1 Program Curriculum (20)

Total Marks 20.00

2.1.1 State the process used to identify extent of compliance of the University curriculum for attaining the Program Outcomes and Program Specific Outcomes as mentioned in Annexurel. Also mention the identified curricular gaps, if any (10)

Institute Marks : 10.00

Table 2.0.1: List of Program Outcomes

PO1	**Engineering Knowledge:** Apply the knowledge of mathematics, science, engineering fundamentals, and an engineering specialization to the solution of complex engineering problems.
PO2	**Problem Analysis:** Identify, formulate, review research literature, and analyze complex engineering problems reaching substantiated conclusions using first principles of mathematics, natural sciences, and engineering sciences.
PO3	**Design/Development of Solutions:** Design solutions for complex engineering problems and design system components or processes that meet the specified needs with appropriate consideration for the public health and safety, and the cultural, societal, and environmental considerations.
PO4	**Conduct Investigations of Complex Problems:** Use research-based knowledge and research methods including design of experiments, analysis and interpretation of data, and synthesis of the information to provide valid conclusions.
PO5	**Modern Tool Usage:** Create, select, and apply appropriate techniques, resources, and modern engineering and IT tools including prediction and modeling to complex engineering activities with an understanding of the limitations.
PO6	**The Engineer and Society:** Apply reasoning informed by the contextual knowledge to assess societal, health, safety, legal and cultural issues and the consequent responsibilities relevant to the professional engineering practice.
PO7	**Environment and Sustainability:** Understand the impact of the professional engineering solutions in societal and environmental contexts, and demonstrate the knowledge of, and need for sustainable development.
PO8	**Ethics:** Apply ethical principles and commit to professional ethics and responsibilities and norms of the engineering practice.
PO9	**Individual and Team Work:** Function effectively as an individual, and as a member or leader in diverse teams, and in multidisciplinary settings.
PO10	**Communication Skills:** Communicate effectively on complex engineering activities with the engineering community and with society at large, such as, being able to comprehend and write effective reports and design documentation, make effective presentations, and give and receive clear instructions.

PO11	**Project Management and Finance:** Demonstrate knowledge and understanding of the engineering and management principles and Apply these to one's own work , as a member and leader in team , to manage projects and multidisciplinary environments.
PO12	**Life-Long Learning:** Recognize the need for, and have the preparation and ability to engage in independent and life-long learning in the broadest context of technological change.

Table 2.0.2: List of Program Specific Outcomes

PSO1	***Engineering Fundamentals:*** **The ability to develop computer programs in the areas related to Algorithms, Multimedia, Web design, Big Data Analytics, and IoT to deliver a quality product for society needs.**
PSO2	***Career Development:*** **The ability to excel in Computer Science and Engineering program through quality education, communication skills and ethics which enables them to succeed in computing industry profession.**
PSO3	***Problem Solving Skills:*** **The ability to apply standard practices and strategies in software project development using open-ended programming environments to deliver a quality product for business success.**

Program Curriculum:

Our college adheres to curriculum and syllabi prescribed by JNTUK University, Kakinada. The syllabi comprise of multi-faceted courses covering theory, practical and presently implementing the regulations which are underway

UNIVERSITY CURRICULUM:

A. Process used to identify extent of compliance of the University Curriculum for attaining the Program Outcomes and Program Specific Outcomes. (6)

Sri Vasavi Institute of Engineering & Technology is affiliated to Jawaharlal Nehru Technological University, Kakinada. Depending on the structure and framing of the curriculum and syllabus prepared by the JNTUK, all the Program Outcomes of this B. Tech CSE program offered by it. POs are prescribed by the National Board of Accreditation. Course Outcomes are defined by the course handling faculty aligned to university curriculum. We relate these Course Outcomes with POs and PSOs.

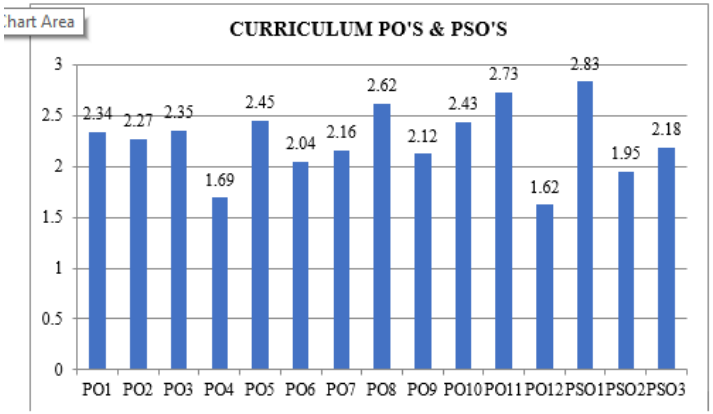

Figure 2.1.1.5 PO's PSO's Average of all courses

All POs are averaged, and we take 80% of the average as target and compare with individual Po Average to identify the gap, then the averages less than the overall 80% average is considered as a gap. All the POs average is greater than the target but PO4, PO12 are less than Overall PO Average. So we conduct events apart from curriculum to attain PO'S less than the overall PO Average.

B. List the curricular gaps for the attainment of defined Program Outcomes (POs) and Program Specific Outcomes (PSOs). (4)

As an affiliated institution, the programs are bound to follow the curriculum set by the university. It is necessary to identify the curricular gaps and take measures to bridge them by supplementing the curriculum with content beyond the syllabus through active teaching and learning methodologies.

The processes to identify the curricular gaps are carried out in the following ways: Feedback from the student exit survey was consolidated to identify the curricular gaps.Employer feedback surveys are consolidated, and the suggestions are considered and conveyed to the appropriate boards responsible for framing the syllabi. An alumni survey has been taken to get information about requirements in industries, and industry experts who

conduct placements through CRTP shall be consolidated, and their suggestions shall be considered by the Program Assessment Committee for identifying the curricular gaps. The shortcomings in the curriculum to attain the Program Outcomes (POs) are identified as curricular gaps.

Program Assessment Committee (PAC) discusses the advantages and disadvantages of the current scheme with the help of course feedback surveys, student exit surveys, alumni surveys, employer surveys, etc., and formulates recommendations for the next scheme. These recommendations are submitted to the university. The Course Outcomes (COs) of the courses are mapped to the relevant POs and PSOs through individual COs to identify the curriculum gaps.

PROCESS OF GAP IDENTIFICATION

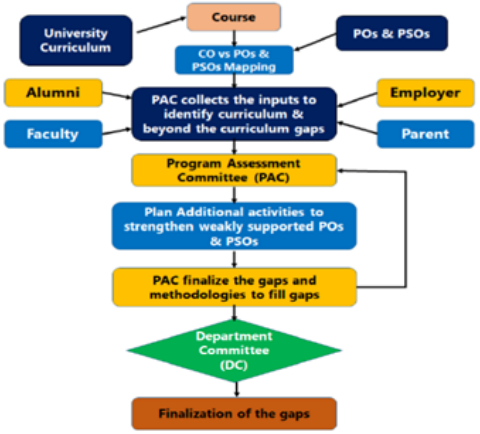

Fig :2.1.1.6 Process for Curriculum gap identification

Curriculum gaps are identified using the following process in the department.

1) University Curriculum is taken as input
2) Course outcomes are prescribed by subject handling faculty by considering Course Syllabus form, affiliated university curriculum.
3) POs defined by NBA and PSOs defined by Department Academic Committee (DC) are considered for mapping of Cos with POs and PSOs.
4) Subject handling faculty identifies gaps of the subject by considering the university curriculum.
5) Alumni, Employer, Student (Exit), and Industry Experts feedback also collected on curriculum.
6) The coordinator of Program Assessment Committee (PAC) collects the gaps from faculty.
7) PAC receives inputs from the coordinator and discuss with them and list out the gaps to conduct, additional activities to strengthen weakly supported POs and PSOs.
8) PAC suggests suitable implementation methods such as conducting certificate courses, additional lab sessions, guest lectures, seminars, workshops and industrial visits etc.
9) PAC sent the identified gaps to provides methodology to fill the gaps are sent to Department Academic Committee (DC) for approval.
10) After approval from Department Academic Committee (DC) the gaps and methodologies to fill the gaps are sent to the College Academic Committee (CAC).
11) The CAC send the list of gaps to the University Director of Academic and Planning (DAP)

Evaluation Process: The consolidated curriculum gaps in each course and the proposed list of actions are put forth for verification by Program Assessment Committee (PAC). After approved by Department Advisory Committee (DAC), the actions are in corporate at various stages of delivery in courses lecture plans and in the department event planner etc. After completion of every action, the DAC conducts an exam feedback session which is followed for acquiring the satisfaction level of the students over those topics introduced as an additional concept for fulfilling the curriculum gaps, and the result is accumulated to the attainment of POs, PSOs. During the semester course instructor assesses the COs and POs/PSOs by conducting assessments, class test, quiz, and mid exams as an internal assessment. The external assessment is done as per the schedule of the affiliated university i.e., JNTUK. The procedural training towards Outcome Based Education (OBE) was imparted to the course coordinators. Relevant courses are collected based on its contents and grouped them as modules which consists of Basic Sciences, Humanities and Social Sciences, Engineering Core and electives and other courses. For each course, the knowledge level of corresponding course outcomes is formulated. Curriculum compliance may be verified by organizing the information into a matrix (CO-PO strength matrix) which maps the link between the course outcomes (COs) and the program out comes (POs). Mapping not only provides the information of what requirements (POs), but also manifests the way and possible level of attaining the POs by curriculum. The same process is extended to COs-PSOs strength matrix. From the identified through consolidation of average CO – PO/PSO mapping of all courses.

CURRICULAR GAP: The courses and the course contents prescribed in the curriculum are mapped to the relevant POs and PSOs through individual course outcomes (COs). Curriculum gaps are identified through consolidation of average CO – PO/PSO mapping of all courses. The identified curricular gaps are as listed below

B. & C. Delivery details of content beyond syllabus & Mapping of content beyond the syllabus with POs and PSOs .(5+3 =8)

Process to identify the gaps for attaining COs, POs, and PSOs

1. The Program Assessment Committee collects the list of curriculum gaps from the university curriculum, faculty, students, alumni, and employers, and then forwards the list of consolidated gaps/content beyond the syllabus with actions to the Department Advisory Committee and Department Committee.
2. The Department Advisory Committee will analyze the list of identified gaps/content beyond the syllabus with actions to strengthen weakly supported POs and PSOs given by the Program Assessment Committee, and it will give the suggestion to the Department Committee for further modification or approval.
3. The Department Committee will finalize the list of gaps with actions. The following are the identified gaps and finalized actions during the assessment period.

A. Adherence to Academic Calendar.(3)

The Department follows the academic calendar set by the JNTU, Kakinada. The Academic calendar consists of two semesters, even and odd. The Calendar includes the schedule of commencement of instructions, first and second internal exams, end semester theory and practical examinations. The department activities and events are scheduled well in advance before the commencement of the semester.

Department calendar of different technical events is prepared well in advance before the commencement of the academic year based on the events of university academic calendar. It consists of the activities planned, and for the semester which include commencement of classes, industrial visits, internal mid semester test dates, university exams, conduction of events like Guest Lectures, Workshops, Faculty Development Programs, etc., as shown in the Figure 2.2.1.1.

HOD/CSE

Figure 2.2.1.2 Academic Process Calendar for the academic year 2023-24

The Program Educational Objectives (PEO's) are established to guide the Programme and prepare the graduates to achieve career and professional accomplishments. The PEO's are further transformed into specific student performance and behaviors that demonstrate student learning and skill development as Program Outcomes (PO's). Program Outcomes (PO's) are clearly and unambiguously defined. As our college is affiliated to JNTU, Kakinada, we follow the curriculum prescribed by JNTUK, Kakinada.

All courses have their own course outcomes. Each course outcome is mapped to relevant PO's and PSO's. Achieving course outcomes is the direct way of accomplishing program outcomes. In this context, the teaching-learning process and assessment methods are implemented in such a way to achieve the CO's. Teaching-Learning process is crucial part of outcome-based education and implements/employs as the set of activities engaging with students to enable them to acquire the knowledge, skills and attitudes. Student-centered and practical oriented lectures, tutorials, collaborative learning, independent learning, peer teaching approaches with integration of appropriate teaching aids, and teaching materials are the educational strategies selected to support the learning outcomes.

Time table coordinator prepares time tables well in advance. HoD conducts meetings before commencement of the semester for course allotment. Heal so requests Principal for allotting faculty to inter disciplinary courses.

Department calendar of events is prepared well in advance before the commencement of the academic year by conducting faculty meetings. The suggestions made by Department Advisory Committee (DAC) are taken into consideration.

The faculty members of department adopt various teaching methods. Faculty members handling laboratory courses will prepare list of experiments to be conducted and laboratory manuals well in advance. Laboratory schedule and student batch division are prepared with reference to finalized timetable. The batch strength is limited to three.Course allotment is done well in advance for the staff members; therefore, they prepare lesson plans, lecture notes, tutorials, assignments and course files well in advance.

Impact analysis

- A coherent framework was provided for smooth and efficient teaching so course contents are effectively delivered in stipulated time. By preplanning of academic calendar, students could plan their academics and utilize the resources properly.
- More number of students efficiently utilized the inter-college and inter-departmental events like Cultural events, Guest lectures, Workshops, Field visits, etc.
- Students effectively planned about industry interactions in vacation. So, the number of students participated in summer training increased

B. Use of various instructional methods and pedagogical initiatives (3)

Improving Instruction Methods Using Pedagogical Initiatives

The Head of the department conducts meeting with all the faculty members to discuss the various teaching learning methods before each semester. He discusses about how to initiate different teaching methods to create the best learning environment for students. Subject experts, domain coordinators give their suggestions and discuss different innovative techniques. Finally, after discussion faculty members adopt various innovative teaching & learning methodologies based on available facilities in campus and planned events. Well-structured lesson plans, lecture notes, tutorial questions with key are prepared and revised for all theory and practical courses on a period-to-period basis and are scrutinized by HoD. The following facilities and Teaching aids are available in the campus for delivering lectures: In every class room, Projector with Wi-Fi facility are used for teaching purpose.

1. Internet facility and different reference books are available to students and faculty in the library.
2. Faculty members are taking advantage of sources like National Programme on Technology Enhanced Learning (NPTEL), Internet sources for effective teaching. Chalk and Talk, LCDs, etc. are used for teaching purposes. Various journals are available in the campus and they are utilized for research & project-based learning.

C. Methodologies to support weak students and encourage bright students (4)

Methodologies to support weak students and encourage bright students Under the HoD‘s directions, class in-charges, counselors, and course faculty members identify those students who fall under the weak students’ category as per the above guidelines. Course faculty members conduct remedial classes for weak students. At that time, they solve previous university examination question papers. Each course faculty member identifies the performance of weak students after the completion of internal examinations and also takes corrective actions like conducting revision classes and slip tests for weak students.

The process of identifying and encouraging weak and bright students is shown below:

Impact analysis

Positive outcomes were observed after adopting the innovative Teaching & Learning Methods.
They are:

1. Improved faculty feedback in various courses
2. Improved attendance of students from starting of the semester to within a week time.
3. Active participation of students in outcome-based education activities.
4. Better relation between students and faculty towards research.

Identifying and Assisting Slow Learners:

1. In this scenario, the weak students are identified with the help of previous semester end examination results. Those students are taken care by conducting remedial classes in the current semester to improve their performance
2. Attempts are made by the teachers to give personal attention to these students Specially developed Handouts, question banks and assignments are given
3. These slow learners are made to mingle with bright students to work in a team for collaborative learning to gain knowledge and get aware of the concern subjects
4. Mentors are allotted for a group of students for continuous monitoring of their performance
5. A special counseling and tutorial classes are conducted by the faculty for those students who failed in any courses

1	Students who fail in semester exams	1. Student counselor follows their progress regularly advising students about attending classes, making up classes missed and getting additional help. 2. Intimating parents to counsel their wards 3. Conduction of remedial classes
2	Students scoring less than 60% of marks in Internal Assessment	4. Conduction of remedial classes 5. Solving previous question papers during tutorial classes.
3	Diploma students who entered with less basics of mathematics	

D. Quality of classroom teaching.(3)

The classes were conducted as per the prescribed timetable with the help of various instructional methods and pedagogical initiatives.

1. Proto type/ Components are used to demonstrate the technical concepts.

2. Guest Lectures by industrial & academic experts are conducted to get aware of the latest technology
3. Lectures are delivered by using PowerPoint presentations for effective delivery.
4. Students are encouraged to present seminars in the classrooms and students are encouraged to participate in various technical events conducted by other institutes. Class in-charge takes the absentees report of their respective class.
5. He/ She maintains class time table, lesson plans, tutorial questions, assignment questions
6. Class in-charge is allocated to every section. Coverage of the syllabus content is observed at every fifteen days by HOD and also review is conducted by Principal twice in a month
7. Meanwhile Dean Academics and Principal will regularly check the class room activity and give suggestions whenever required. Class in charge and HOD monitor the classes regularly
8. The parent's correspondence reports along with the comments of parents are submitted to the HoD and Dean academics once in a week.
9. Parent communication letters are posted to parents of those students who are having less than 65% attendance once in a month. Every 15 days the attendance is circulated and signatures are taken from students
10. Communicate parents of students who are absent to the classes regularly through telephonic conversations.

E. Conduct of Experiments Continuous Assessment in laboratory (3):

Conduct of Experiments:

1. All the laboratories in the department are maintained neatly, with equipment in good working condition. Also, proper care is taken regarding safety and protection in the laboratory.
2. Students should report to the respective lab as per the schedule.

3. The batch-wise division made in the beginning should be adhered to, and no mix-up of students among different groups will be permitted later. Students are required to prepare thoroughly to perform the experiment before coming to the laboratory.
4. Each batch will get the equipment by submitting the indent to the lab assistant and conducting the experiment.
5. After connections are completed, students need to get them verified by the staff in charge, and then only the supply has to be turned on. Students have to conduct the experiment by following the procedure mentioned in the observation and recording the readings.
6. When the experiment is completed, students should disconnect the setup they made and return all the components and instruments taken for the purpose. Any damage to the equipment or burn-out of components due to the negligence of the student will result in a penalty being awarded.
7. After completion of the experiment, the student should get the observation book corrected by the staff in charge of that lab.
8. The record of observations along with the detailed experimental procedure of the experiment performed in the immediate last session should be submitted.
9. The curriculum stipulates 2 or 3 laboratory courses per semester from 1st to 7th.
10. Students carry out more than the required number of experiments, beyond the minimum specified by the university. All laboratories have excellent facilities with the required
11. For the experiments, detailed instruction manuals are provided.
12. The observations are checked and verified by faculty, and record books are maintained. Course faculty members and one instructor or technical staff member are assigned for each practical class.
13. Additional lab facilities are available beyond working hours.
14. We provide 2 or 3 additional experiments for some laboratory. Those who are interested can utilise the facilities during additional lab facility time.SAMPLE INDEX SHEET OF RECORD

Lab manuals and cycle of experiments are prepared before the beginning of the semester. Minimum of 2 faculties are allotted for each lab so that they can explain the experiments to the students. Students have to maintain an observation book in which students have to write the details of the experiment and also record the experimental values. Observations are corrected on the same day and once it is corrected, they have to write the fair record and which will be corrected in the next lab.

Continuous evaluation is followed in labs. The faculty will record the observation marks and attendance of the students on day to day basis. A practical test is conducted along with viva at the end of the semester. The internal marks will be awarded considering the marks obtained by students in continuous evaluation, fair record and test.

F. Continuous Assessment in laboratory (3):

1. A continuous assessment system is also implemented for the assessment of laboratory work.
2. The assessment is done on the basis of the submission of laboratory records, understanding of the experiment through participation in performing the experiment, and viva voce.
3. In every lab session, faculty update student record marks in the teacher ‘s attendance register. For practical subjects, there will be continuous evaluation during the semester for 30 internal marks and 50 end examination marks as per JNTUK R16 Regulations. For practical subjects, there will be continuous evaluation during the semester for 20 internal marks and 30 end examination marks as per JNTUK R19 Regulations. For practical subjects, there will be continuous evaluation during the semester for 15 internal marks and 35 end examination marks as per JNTUK R20 Regulations.

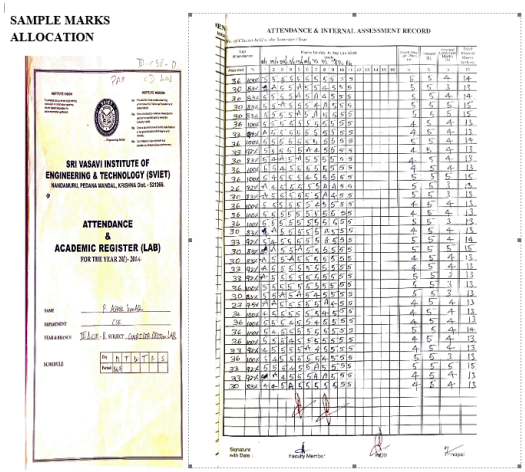

Figure 2.2.1.12 Continuous Evaluation in laboratory

Impact analysis:

1. New view points and new project ideas are derived in the lab.
2. Improvement in the analytical abilities of students thus improves placement.
3. The stimulating environment created in laboratories is based on additional lab facilities, additional experiments, and mini-projects. It made students learn other technical aspects aside from the curriculum.

Good results in the laboratory examination.

G.Student feedback of teaching learning process and actions taken(6):

Student feedback of teaching learning process and actions taken:

The teaching & learning system followed by any educational institution needs continuous refinement. To capacitate the process of continuous refinement, the institution has adopted a feedback system that takes suggestions from students of each program.

This eventually helps to fine tune the teaching &collecting feedback for all the courses that are being taught twice in a semester, through the ECAP (Engineering College Automation Package) learning process and the curriculum. The Institution follows a well-defined and formal feedback system. Feedback system has been identified as one of the important processes in our Quality Management System. Feedback collection process: software.

The consolidated report containing grades for each faculty is sent to the respective Head of the Department and the information is circulated to the faculty of the department for necessary action.

Once the feedback collection process is completed, the reports are generated automatically.

- **Process Steps for Student's Feedback**

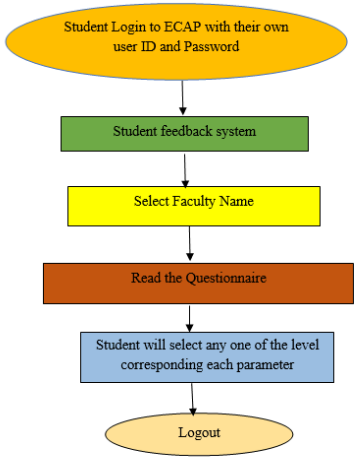

Figure 2.2.1.13 Process of feedback

1. Feedback is taken through online from each student.

2. Based on following questions, feedback percentages are taken for each subject from each student

Figure 2.2.1.14 Sample e-cap Feedback form

Actions Taken Procedure:

1. The increments and promotions are given based on student feedback in faculty appraisal form.
2. Those with low scores will be counseled and asked to improve their performance in the subsequent semesters by taking help from senior and experienced teachers or attending pedagogical training or other faculty development programs as per the necessity.
3. The faculty members are constantly motivated by giving a word of appreciation in the departmental meetings.
4. Normally the feedback of the students is used to improve the performance of the faculty members.
5. They are advised to improve upon specific areas like black board management, class control, effective teaching, usage of teaching aids, etc.
6. Apart from this, the faculty members are encouraged to attend various faculty development programs (FDPs) / seminars / workshops to improve their skills.
7. If needed explanation from the faculty will be demanded for any inappropriate result and subsequent action will be taken for improvement of the performance of the faculty member.
8. Counseling will be given to the faculty concerned by HOD and Principal whenever required.

Feedback Analysis Process:

1. The feedback collected from students is first analyzed at the level of HoD and then at the level of Principal.
2. The contents of the feedback will be shared with each faculty member personally based on the parameters in questionnaire and their metrics of measurement in the given format on a scale of 4. Based on the parameters, the feedback given on faculty by the students is taken from the students and the average is calculated Those with low scores will be counseled and asked to improve their performance in the subsequent semesters by taking help from senior and experienced teachers or attending pedagogical training or other faculty development programs as per the necessity.

2.2.2 Quality of internal semester Question papers, Assignments and Evaluation (20) Institute Marks : 20.00

A. Process for internal semester question paper setting, evaluation and effective process implementation.(5)

Internal Assessment Test:

1. The institute conducts two mid exams after completing 8th week and 16th week respectively based on the academic calendar issued by JNTU, Kakinada.
2. Each test covers half of the syllabus and the tests are conducted for the marks based on the regulation.
3. The duration of the test is one and half-hour and question paper is set to make the student to learn time management.
4. Online quiz exam is conducted by JNTUK comprising of 20 objective questions each carrying half mark.
5. The department has a Scrutinizing Committee called DAC (Department Assessment Committee), comprising of HOD and two senior faculty members to check the quality of the question paper, BT levels and Cos compliance
6. The Internal Mid question papers-2 sets are prepared for half of the syllabus for 1st mid and second half of the syllabus for 2nd mid exams as per the blooms taxonomy levels and these sets are verified by the DAC (Department Assessment Committee).
7. According to level of toughness the questions are prepared (viz., analyzing the problems, implementation of modern tools, formulating the problems, etc.), which is termed as Bloom's Taxonomy.
8. For each question the teachers mention assigned marks, outcome number and Bloom's taxonomy level. While preparing the question bank all previous university exam papers are taken into consideration.
9. The Examination section collects 2 sets of question papers for all the courses and they finalize the question paper for internal examinations.
10. The faculty members after every internal assessment test explain the solution of the questions in the class which will enable them to perform well in the final examination.
11. The subject faculty members prepare the scheme of evaluation for the question paper and then evaluate the answer papers based on the scheme.
12. The marks are evaluated based on the regulations. Finally, the Marks scored by the student in every test are sent to their parents by post and displayed in the notice board.

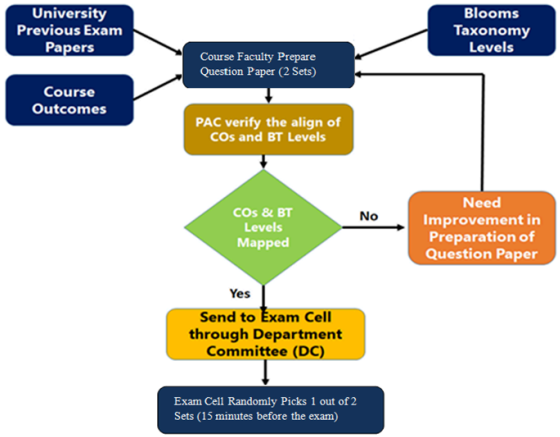

Figure 2.2.2.1: Process for preparation of mid examination question paper Internal Question paper process

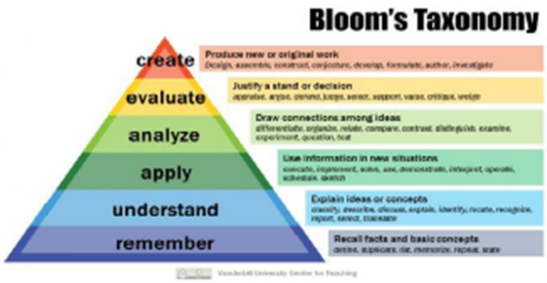
Procedure for Conduction and Evaluation of Internal Assessment Test:

1. The timetable for the mid exams will be announced in the notice board 2-3 days prior to the commencement of the test.
2. The students write the test in their allotted seats in a test hall under the invigilation of a faculty member
3. The scheme of valuation for the question paper is prepared by the course coordinator ensuring appropriate distribution of marks for fair valuation
4. The faculties after all mid exams explain the solution of the questions in the class which will enable them to perform well in the final examination

B. Process to Ensure Questions from an Outcomes/Learning Levels Perspective.(5)

1. Every course coordinator is responsible for analyzing the quality of question paper, mapping with COs and Bloom levels. The scheme and solution of internal question paper is maintained by course coordinator
2. The DAC will suggest the modifications in the question paper in case of any discrepancies and verifies it.
3. Examination Branch is responsible for ensuring the quality of question papers.. External Examination question papers are set by eminent persons from reputed educational institutions as per the supplied syllabus and the same is moderated/verified by course coordinator at examination branch on the day of examination.
4. Rubrics are prepared for project evaluation by the project coordinator .Attainment of COs and POs are calculated after the evaluation of answer sheets and the gaps are identified to address the curriculum gaps



C. Evidence of CO's coverage in class test / mid – term tests (5)

1) Trade offs in Statistical Learning:-
In Statistical Learning the ML tradeoffs including the Variance & balance between the Variance computational complexity and generalization ability of the model
i) Bias - Variance
ii) Overfitting & Underfitting
iii) Computational Complexity Vs Model performance
iv) Interpretability Vs predictable
v) Training Set Size Vs Model performance.

D. Quality of Assignments and its elegance to COs (5)

Assignments:

The course coordinator announces assignment topic, submission dates and communicates in the class. Assignments are designed in such a way to promote self-learning from various sources Assignments are evaluated for 5marks and feedback is given to the students to improve their learning and appreciate their efforts

Initiatives for implementation of Quality Assessment:

1. Assignments promote practice. Assignments may include theory, design, analysis, and problems.

2. A minimum of two assignments are given for every course, and each assignment is evaluated for 5marks.
3. The assignments are being practiced for the continuous improvement of learning capabilities and for good writing skills. These assignment questions are prepared as per Blooms Taxonomy levels.

Explanation for scheme of evaluation, grievances both internal and end exam.

- There will be two internal examinations for each semester which are evaluated by conducting two descriptive exams (Each 15 marks), two online examinations (Each 10 marks) and assignments (5 Marks).
- The scheme of evaluation will be prepared by concern faculty member with division of marks.
- The answer booklets will be given to the students after evaluation and if any grievance like counting problem happens then it will be rectified by the concern faculty at the same time.
- Any grievance in the end examination can be applied to the university in the form of Recounting and Re- Valuation.

2.2.3 Quality of student projects (25)

Institute Marks : 25.00

Initiatives:

1. The student's projects are selected in line with the departments vision, mission, and program outcomes.
2. Students are provided knowledge about different domains and broad areas for selecting their projects.
3. The list of previous years projects is displayed on a notice board, which ensures no repetition of projects.
4. The faculty members encourage the students to do project work with the facilities available in the department. Further, students are advised to take up industry projects.
5. The faculty members encourage the students to present posters and exhibit their work.
6. Students are encouraged to publish and present their project work in various journals and conferences.
7. Students are allowed to form groups that consist of a minimum of 3 or a maximum of 4 members.
8. If the students are not able to form the group, then the project coordinator will help them do so.
9. Implementation: The project coordinator is appointed by the head of the department and is responsible for the planning, scheduling, and execution of all the activities related to the student project work.

The Department Project Review Committee (DPRC), consisting of the Head of the Department, senior faculty members, and the Project Coordinator. DPRC evaluates and identifies the best projects by considering factors such as environment, safety, ethics, and cost.

Task	Particulars
Call for project batch and guide allotment	Students are asked to prepare their batch with the help of project coordinator of the department. With respect to the areas of interest of each guide the batches will be allotted to guides.
Call for Project Titles	Students are instructed to submit the title of the project in consultation with their respective guide to the project coordinator.
Synopsis submission	The student submitting project titles are pre-evaluated by DPRC.
Project title finalization and Abstract submission	The submitted project titles are reviewed by a committee Consisting of Project coordinator, Head of the department and some senior faculties (project committee).
First Review	Students are instructed to submit software requirement Specification and give a power point presentation for the project(Evaluation phase I by a team of faculty)
Second Review	Students are instructed to submit design documents of the project and give a PowerPoint presentation for the project (Evaluation phase II by a team of faculty)
Third Review	Students are instructed to submit complete project report with university compliance and give a Power Point presentation for the project (Evaluation phase III by a team of faculty)
Project internal marks announcement	The marks for the project work are announced and processed according to the university regulation

SAMPLE BATCH

Review-1 by DPRC

Components	*Marks (M)*	*Criteria*	*Exceptionally well Executed (M>90%)*	*Good with Room Improvement (70%)*	*Meets Minimum Requirement (M<70%)*
Title and Feasibility	*10*	*Scope*	**The title accurately reflects the scope and objectives of the study, ensuring immediate clarity for the audience.**	**The project is realistic and achievable within the given time frame, resources, and expertise available.**	**The study addresses a relevant problem or gap, indicating its potential value and applicability in real-world contexts.**
Abstract and its Depth	*10*	*Content*	**The abstract effectively summarizes the key aspects of the study—objectives, methods, results, and conclusions—in a clear and concise manner.**	**It reflects a deep understanding of the research by highlighting the significance and implications of the findings.**	**The abstract captures interest while providing sufficient detail to inform and guide readers about the studys core contribution.**
Presentation	*10*	*Presentation*	**The presentation was well-organized, with a logical flow that made complex ideas easy to understand.**	**Effective use of visuals, voice, and timing helped maintain audience interest and enhance message clarity.**	**The presenter demonstrated strong knowledge of the topic, answered questions effectively, and conveyed information with confidence.**

Review-2 by DPRC

Components	*Marks (M)*	*Criteria*	*Exceptionally well Executed(M>90%)*	*Good with Room Improvement (70%)*	*Meets Minimum Requirement (M<70%)*
Design and analysis	*10*	*Structure*	The study employed a well-structured and appropriate design that effectively addressed the research objectives.	Data was analyzed using suitable methods, providing meaningful insights and supporting the study's conclusions.	The design and analysis together ensured credible, consistent results, enhancing the study's overall trustworthiness.
Implementation	*10*	*Plan*	The planned system or solution was implemented effectively, meeting the desired objectives and functionality.	The implementation demonstrated reliable performance, with optimized use of resources and minimal issues.	The solution is designed to be scalable and adaptable, allowing for future enhancements and real-world application.
Expected Results	*10*	*Target*	The expected results are directly aligned with the study's goals, ensuring relevance and focus.	Anticipated outcomes aim to contribute meaningful insights or improvements in the targeted field or problem area.	The results are expected to open avenues for further research, development, or real-world application.

Review-3 by DPRC

Components	*Marks (M)*	*Criteria*	*Exceptionally well Executed (M>90%)*	*Good with Room Improvement (70%)*	*Meets Minimum Requirement (M<70%)*
Coding	*10*	*Code base*	**The code is well-structured, optimized, and follows best practices for readability and maintainability.**	**All key features and requirements were successfully implemented, ensuring the code meets project objectives.**	**The code base is scalable and has been thoroughly tested and debugged, minimizing errors and supporting future enhancements.**
Execution	*10*	*Execution*	**The project was executed according to plan, with each phase completed systematically and on time.**	**Execution remained focused on meeting the defined objectives, ensuring all critical tasks were accomplished effectively.**	**Challenges during execution were handled efficiently, demonstrating adaptability and strong project management.**
Presentation	*10*	*Presentation*	**The presentation was well-organized, with a logical flow that made complex ideas easy to understand.**	**Effective use of visuals, voice, and timing helped maintain audience interest and enhance message clarity.**	**The presenter demonstrated strong knowledge of the topic, answered questions effectively, and conveyed information with confidence.**

A. Identification of Projects and Allocation Methodology to Faculty Members (3)

The project coordinator identifies the different research areas. DPRC identified research areas such as data mining, information security, network security, cloud computing, e-commerce, deep learning, data security, cloud security, cyber security, and web mining.

Department Project Review Committee(DPRC)

- The DPRC committee will be responsible for evaluating the timely progress of the projects and communicating the progress report to the students.
- At the end of the IV Year I Semester, the Department Project Review Committee should finalize the list of student batches with their projects, the list of available supervisors with their interesting research areas, and the list of identified research areas by the department if any research work is going on or specified by any faculty member.
- The list of all the projects conducted in the last 3 academic years by the department will be maintained along with their supporting documents like literature surveys submitted by the student groups, project evaluation forms, etc.
- It is ensuring that the department is equipped with high-quality laboratories so that the students have access for their project purposes.
- In case it is observed by the DPRC that any group of students is not performing well, the committee should take special care to improve their performance by counseling them.

AcademicYear 2023–24

The following faculties are nominated as members of the departmental Project Review Committee (DPRC) to evaluate the project work of IV B. Tech. students:

Table 2.2.3.3 Department Project Review Committee for the academic year 2023– 24

S.No.	Name of the Faculty	Designation	Position
1	Dr. G. Syam Prasad	Professor & Head of the Department	Chairman
2	Dr. BR Srinivasa Reddy	Professor	Member
3	Dr.G. Sambhasiva Rao	Professor	Member
4	Dr. Ch. V. Phani Krishna	Professor	Member
5	S.V.C Gupta	Professor & CE	Member
6	SK. Ahmed Mohiddin	Associate Professor	Coordinator

Objectives of DPRC:

1. DPRC should follow the academic regulations R20 for B.Tech. (Regular) issued by JNTUK, Kakinada.
2. DPRC is responsible for the internal evaluation of each students project work.
3. DPRC should be aware of Pos and PEOs.
4. DPRC should check whether the plan of action meets the project requirements or not.
5. DPRC should verify whether the project work meets the plan of action specified in review1 or not in terms of scope, quality, and time period for module implementation

Allocation of Supervisor:

Each project activity must be supervised by the faculty members of the department. These faculty members are termed supervisors. There can be at most two supervisors for a B. Tech. project, out of which at least one has to be from the department and the other can be from outside the department or institute. However, in order to select a supervisor from outside the institute, the department has to get prior permission from the principal.

Project group formation:

Each B.Tech. project has to be carried out by a group of students from the department. In order to ensure the participation of each student, the group size should be preferably at least 3 but not more than 4 students. The formation of project groups should be done such that each group has representation of Students with varying academic merit, from best to average.In view of this, the following practice may be followed:

1. Decide the total number of feasible groups.Any left-out student(s) should be randomly assigned to any group. Enlist the students in the order of their previous years merit.
2. Depending on the number of groups to be formed, identify the group members in order of merit.
3. After forming the project groups, students should select the project supervisor based on the procedure specified by the DPRC and submit the project registration letter to the project coordinator. In cases where the project is multi-disciplinary, a project group can be formed consisting of students from other departments. But there must be at least one student from the department who is offering the project

D. Process to assess individual and team performance. (5)
Evaluation Procedure:
The project work shall be evaluated for 200 marks, out of which 60 marks are for internal evaluation and 140 marks are for end-of-semester evaluation. To ensure proper conduct of each project,the progress of each project should be monitored on a continuous basis, first by the supervisor and then by the Department Project Review Committee. In order to do so, it is planned to hold two presentations to be made by each project group. The evaluation shall be done on the following basis:

Review1 (Preliminary Evaluation): 30 marks	**Review 2 (Design Evaluation): 30 marks**
Review 3 (Implementation Evaluation): 30 marks	**End-Semester Evaluation:140 marks**

Internal Marks (60)

The supervisor assesses the student for 30 marks (Report: 15 marks, Seminar: 15 marks). At the end of the semester, all projects shall be showcased at the department for the benefit of all students and staff. Every project is to be evaluated by the departmental Project Review Committee consisting of supervisor, a senior faculty and HOD for 30 marks are the average of Reviews 1,2&3.

Guide's/Supervisor evaluation of marks is as follows:

Table 2.2.3.4 Criteria for Project Guide/ Supervisor marks evaluation

In Semester VII, the Review 0 will be purely problem identification, and it is for preliminary evaluation, which will be taken by the Department Project Review Committee(DPRC)in two to three weeks before the end of these semester of the third year (VII semester).In this presentation, they are required to show a brief PowerPoint presentation with no more than 10–15 slides. Students add graphical (pictures, block diagrams, flow charts, etc.) information related to the content of the presentation whenever they need it.

The presentation describes the following:

- The main aim or objective of the project
- Literature survey
- Problem Formation
- Expected results and proposed title of the project

This presentation shall be made before the respective project supervisor first, and on his approval,it should be made before the Department Project Review Committee.

The second presentation of this project will be planned by the DPRC two weeks after the commencement of the first semester of the fourth year. This presentation will review the following:

- Introduction Problem Statement
- Methodology
- Modules
- Detailed Design
- Equations, design, and software to be used Algorithms/ Techniques used
- Expected outcomes
- Plan of action for the project

DPRC should plan for the third presentation. This presentation will review the following:

- Introduction
- Abstract Methodology
- Modules Split-up and Gantt Chart Detailed Design(if any deviation)
- Work progresses towards the proposed system.
- Questions, design, and software to be used Algorithms/ Techniques used
- Expected outcomes
- Plan of action for the project (if any deviations)

The final internal presentation will be taken two weeks before the date of the final external presentation. This presentation will be made before the DPRC, and project guide of the department. The final project report should be extensively checked and signed by the supervisors and also by the DPRC.The groups are also required to make a final Power Point presentation.

C.Process for Monitoring and Evaluation (5)

1. Every week students will meet their guide three times as per schedule.
2. Guide will check their project diary and write comments.
3. Students will work on the comments given by the guide and rectify mistakes.
4. Guide will submit the progress report to the project coordinator and project coordinator submits them to the HOD.
5. Students have to submit synopsis to the internal guide/co-guide
6. Internal guide/co-guide will give suggestions towards the improvement of the project work.Based on inputs, students have to start their work. In case, the student is doing project outside the institute such as industry internships, he/she has to consult the guide and co-guide towards implementation of the project.
7. The students have to give presentations three times on the project work which is reviewed by the project review committee; Internal guide will be a member of the committee.
8. Upon satisfactory reviews of the projects, project review committee will allow the students for submission of the report.

External Evaluation scheme for projects:

1. Project viva voce examiner will be appointed by the JNTUK, Kakinada.
2. There will be a proposed time period to conduct project viva voce-JNTUK, Kakinada examiner will be contacted by the project coordinator to fix a suitable date and informs the same to the students.
3. Project viva voce will be held as per JNTUK, Kakinada schedule.

Impact analysis:

1. New innovative ideas from students form the basis of some projects Skills or abilities (Verbal/Non- verbal) of students improved.
2. Knowledge on various aspects of project management were developed.
3. Confidence level of the students was boosted.
4. Improved team work spirit.
5. Implementation and deployment of the project for social benefits.
6. Document preparation and presentation
7. Opportunities to show case their project work in project exhibition

E. Quality of completed projects / working prototypes. (5)

Summary Report of Best Projects

The university will appoint an examiner to inspect all the prototypes developed by students as part of their final-year project work and identify the three best projects from every year.

The following table shows the three best projects of the last three assessment years.

Institute Marks : 15.00

A.Industry Supported Laboratories (5)

With the focus on skill and industry professionals, the institute established an e-Yantra centre in collaboration with IIT Bombay, a lab with a total area of 90 Sq Mts (Room No: B1-008) having hardware and software & Virtual Labs (Room No: B1-309) in collaboration with College of Engineering, Pune (CoEP), Sponsored by MHRD. On an average, each student undergoes 40 hours of training oriented to skill development.

Greetings from Aon Assessment Solutions!

This has reference to our discussions with you regarding the engagement by **Sri Vasavi Institute of Engineering & Technology** ("Client") of **Aon Consulting Private Limited** ("Aon"), for availing the Services defined hereinafter. We are bringing on record the following terms of our engagement. Please send us an **email confirmation on the below Scope, Fees and the General Terms & Conditions along with the signed copy of attached agreement from your end**:-

In the event of a conflict with any Purchase Order or other documents issued by the Client based on this Agreement, the terms of this Agreement shall prevail.

1. **Scope of Services and Project Plan –**

Our scope of services for this Agreement will be limited to **CoCubes Final Year Program – Engineering – 2024 Batch** and will include the following:

Offering	Degree	Batch	Count of Students	Actual Unit Price	Unit Price for SVIET Students
7 DCT's + 2 CoCubes	B.Tech	2024	80	INR 1532 inclusive of tax	INR 1200 inclusive of tax

2. **Timelines**

This Agreement shall commence on **30th October 2023** (the "**Effective Date**") and shall remain in effect for a period of **1 Year** ("**Term**"), unless terminated earlier in accordance with the provisions of this Agreement. Any deviation/delay, that impacts the timelines from the project plan and is not attributable to Aon, shall not constitute a delay by Aon.

BETWEEN

Sri Vasavi Institute of Engineering & Technology
AND
LEO Global Overseas

This Memorandum of Understanding (hereinafter called as the 'MoU') is entered into on this the 21stday of Oct2022by and between **Sri Vasavi Institute of Engineering & Technology**
The First Party represented herein by its Principal, **Dr. D .Raja Ramesh** And **LEO Global Overseas**. The second party and represented herein by its Director, Mr. **Veeranjaneyulu Lagadapati (Managing Director)**

WHEREAS:

A) First Party is a Higher Educational Institution named: **Sri Vasavi Institute Of Engineering&Technology.**

B) First Party & Second Party believe that collaboration and co-operation between themselves will promote more effective use of each of their resources, and provide each of them with enhanced opportunities.

C) The Parties intent to cooperate and focus their efforts on cooperation within area of Skill Based Training, Education, Placement, Industrial Visit, Expert Lecture.

D) **LEO Global Overseas** - the Second Party is engaged in providing overseas career consultancy and placement services.

NOW THEREFORE, IN CONSIDERATION OF THE MUTUAL PROMISES SET FORTH IN THIS MOU, THE PARTIES HERETO AGREE AS FOLLOWS:

C. Impact Analysis of Industry Institute Interaction and Actions Taken Thereof (5)

Impact Analysis

- The effectiveness of this practice can be gauged by the great response of the participants. Students exposed to industrial application of concern courses.
- Due to this Vigorous Training, students got placed in companies & got various prizes in National Level Competitions.

Team – SVIET (PHOENIX with 3 students from CSE department) got first prize in SIH Senior Software Edition category of Smart India Hackathon- 2022 Competition @ SVCET, PUDUCHERRY. Team PHOENIX received a Cash Prize of 1 Lakh Rupees

2.2.5 Initiative related to industry internship/summer training (15)

Institute Marks : 15.00

A. Industrial training/tours for students (3)

To strengthen interaction with industries and to keep our students updated with the latest trends in Computer Science and Engineering, the Department has entered into an agreement with the following companies to provide:

- Internships
- Students specific Training and Assessment
- Workshops

S.No	Name of the Organization	Purpose	From Date	To Date
1	Eduskills	Internship, Workshop and training	12/06/2020	12/06/2026
2	Excel R	Internship, Workshop and training	17/05/2023	17/05/2025
3	Co Cubes Technologies	Student Performance Assessment	01/11/2015	31/10/2024
4	ICT Academy	Workshop and training	04/08/2023	03/08/2024

Industry tours offer students valuable practical experience, bridging theory with real-world application, enhancing soft skills like communication and teamwork, and providing insights into career paths and industry operations. Our Computer Science & Engineering have gone for industrial visit to various organizations.

- The students are encouraged to visit industries.
- Faculty members coordinate and give suggestions, guidelines and scope and contact details of an industry.
- They also help the students by interacting with the industrial experts, provide the students recommendation letters and other necessary supports.Industrial Visits:

Industrial Visit Report 2023-24:

Industrial visit has been conducted for III year B.Tech with 71 students and 4 faculty namely K .Divya, M . Prasanthi, M.Madhusudhana Rao, MD.Shamsheer on 17/2/2024 To 21/2/2024 visited, PySpider Technologies located in Bangalore, kayne's technology located in Mysore.

KAYNES Technology established in Mysore, delivers Total Manufacturing Solutions with integrated business verticals to cover the entire bandwidth of Electronic Manufacturing Services starting from Design Services thru Prototyping, Sourcing, The company has been providing End- to- End Solutions to the organized sector in the field of IT Peripherals, Industrial Controls, Telecom, Energy, Medical Electronics, Defense Electronics to leading Companies such as Analog Devices Inc.

The visit to Pyspider campus at Whitefield was learning and knowledge gaining experience, as the students got an opportunity to know more about some technical aspects of IoT, its current applications and ongoing projects on it. The visit was very useful to the students in a professional manner.. The session started off by a welcome address by Ms. Anjana, Regional Head- Talent Acquisition. She gave us a brief on all the events conducted by Pyspider which is open to students and gives students the opportunity to showcase their talents and skills.

B.Industrial /internship /summer training of more than two weeks and post training Assessment (4)

The AICTE-EduSkills virtual internship program, launched in partnership with the Ministry of Education, aims to enhance employability by providing students with practical industry experience, bridging the gap between academia and industry, and thereby increasing their job prospects upon graduation

C. Impact Analysis of Industrial Training (4)

Impact of the Internship is as follows:

The internship has had an impact on the students in the following aspects:

1. Students gained innovative, technical ideas and Industry Standards from industry professionals (PO2, PO3, PO5).
2. The skills and abilities of students were improved (PO3, PO5, PO10).
3. The confidence level of the students was boosted (PO9, PO10, PO12).
4. The team spirit of the students was improved (PO9, PO10).
5. Helped the students get an idea about their final project, apprenticeship after graduation, and job in the core sector (PO2, PO3, PO4, PO5, PO10, PO12).

Impact of the industrial visits is as follows:

1. Students got familiarized with the industrial environment and the technical work, technologies involved, in products. The feedback of the students was found to be highly enthusiastic.
2. The students were more motivated to learn the concepts with a practical perspective by correlating with the theoretical aspects already learnt.

3. These visits helped the students in the execution of the projects. For instance, it also helped the students in executing projects in health and medical domains.

Define the Program specific outcomes

3.1 Establish the correlation between the courses and the Program Outcomes (POs) and Program Specific Outcomes (PSOs) (20)

Total Marks 20.00

:

PSO1	Engineering Fundamentals: The ability to develop computer programs in the areas related to Algorithms, Multimedia, Web design, Big Data Analytics, and IoT to deliver a quality product for society needs.
PSO2	Career Development: The ability to excel in Computer Science and Engineering program through quality education, communication skills and ethics which enables them to succeed in computing industry profession.
PSO3	Problem Solving Skills: The ability to apply standard practices and strategies in software project development using open-ended programming environments to deliver a quality product for business success.

3.1.1 Course Outcomes(COs)(SAR should include course outcomes of one course from each semester of study, however, should be prepared for all courses and made available as evidence, if asked) (5)

Institute Marks : 5.00

Note : Number of Outcomes for a Course is expected to be around 6.

Course Name :	C2 13	Course Year :	2021-2022

Course Name	Statements
C2 13.1	Make use the structure of OS and basic architectural components involved in OS
C2 13.2	Implement various process scheduling algorithms and Solve Different Process Synchronization ProblemsImplement various process scheduling algorithms and Solve Different Process Synchronization Problems
C2 13.3	Compare and contrast various memory management schemes and page-replacement algorithms
C2 13.4	Implement various deadlock algorithms and different file system structures
C2 13.5	Examine system protection and system security

Course Name :	C2 24	Course Year :	2021-2022

Course Name	Statements
C2 24.1	utilize object oriented programming concepts and Java Basics
C2 24.2	Compare Classes and Objects in JAVA Programming
C2 24.3	Implement inheritance,Packages and Exception handling concepts
C2 24.4	Execute Multi-Threading concepts and Input output Streams
C2 24.5	Design and implement Applet and event handling mechanisms in application programs
C2 24.6	Use swings aspects in graphical interactive application development

Course Name :	C3 12	Course Year :	2022-2023

Course Name	Statements
C3 12.1	Analyze the performance of a given algorithm, denote its time complexity using the asymptotic notation for recursive and non-recursive algorithms
C3 12.2	List and describe various algorithmic approaches and Solve problems using divide and conquer &greedy Method
C3 12.3	Synthesize efficient algorithms dynamic programming approaches to solve in common engineering design situations.
C3 12.4	Organize important algorithmic design paradigms and methods of analysis: backtracking, branch and bound algorithmic approaches
C3 12.5	Demonstrate NP- Completeness theory ,lower bound theory and String Matching

Course Name :	C3 23	Course Year :	2022-2023

Course Name	Statements
C3 23.1	Make use the principles of cryptography for information security

C3 23.2	Use substitution and transposition transformations in symmetric encryption algorithm
C3 23.3	Use number theory knowledge in asymmetric encryption algorithm
C3 23.4	Examine hash algorithms and digital signatures for online authentication
C3 23.5	Compare various network security protocols

Course Name :	**C4 14**	**Course Year :**	**2023-2024**

Course Name	Statements
C4 14.1	Apply the Categories and functions of various Data communication Networks.
C4 14.2	Design and analyze various error detection techniques
C4 14.3	Demonstrate the mechanism of routing the data in network layer
C4 14.4	make use the significance of various Flow control and Congestion control Mechanisms.
C4 14.5	Determine application layer services and client server protocols working with the client server paradigms like WWW, HTTP, FTP, e-mail and STMP ,DNS etc.

Course Name :	**C4 21**	**Course Year :**	**2023-2024**

Course Name	Statements
C4 21.1	Select abstract of the project and develop its requirements
C4 21.2	Make use of Self learn new tools, algorithms, and/or techniques that contribute to the software solution of the project.
C4 21.3	Develop a design solution for a set of requirements.
C4 21.4	Test and validate the conformance of the developed prototype against the original requirements of the problem
C4 21.5	Conclusion the summary of the project and identify the impact of the project in the society
C4 21.6	Develop the project individual and in a group

3.2.1 Describe the assessment processes used to gather the data upon which the evaluation of Course Outcome is based (10)

Institute Marks : 10.00

Procedure for Cos:Faculty write CO's in Higher levels of Bloom to achieve Higher order thinking skills for all the courses and present to the committee, later gets accepted and audited by IQAC Members during course file audit.All the faculty are instructed to follow top down approach to write Cos .

Rubrics Level	3	2	2									3		2

All the faculty after writing their course outcomes map with particular PO's and later perform weighted average for every PO.The following Rubrics are taken to determine the CO values for the course
>70=3
40 to 70=2
10 to 40=1
<10=0

The following Procedure is followed by the review committee to finalise the CO-PO Mapping.

Procedure for COs Assessment:

Assessment Tools and Processes :

A. Course Outcome Assessment for Theory Courses

AssessmentMethods	Weights		
Continuous Internal Examination	30%	80%	Final Course Outcome
Semester End Examination	70%		
Course End Survey	20%		

The attainment of course outcome (CO) is assessed through direct and indirect evaluations. The direct attainment is measured based on the performance of the students in the internal and external examinations. The Course end survey questionnaire is prepared by the Course instructor in consultation with the Program Coordinator. The indirect attainment is measured based on course end survey. The Course end survey questionnaire consisting of all course outcomes is distributed to the students at the end of every semester. The Survey reports are assessed with a rating of 3 for excellent, 2 for Good, 1 for Poor. The average of the ratings obtained from course end survey will be taken on 3 points scale. By taking the weighted average of internal, external and course end survey the final co assessment is calculated.

For Theory & Mandatory Courses:

Direct Attainment for subjects:

S.No	Assessment Method	Marks Weight age
1	Mid	15(50%)
2	Assignment	5(10%)
3	Online	10(10%)
4	End Semester Exam	70(30%)

B. The quality /relevance of assessment processes & tools used (8)

Tool used	Frequency of data collection	Responsible person	Assessment criterion	Rubric for Attainment Level	Weightage
Internal examinations. (Mid+Assignments+Quiz)	Twice per Semester	Examinations cell	Students scored > class average mark	3: >70% students 2: 51-69% students 1:40-49% students 0:<40% students	30%

University Examinations	Once per semester	Examinations cell	Students scored > class average mark or Grade D	3: >70% students 2: 51-69% students 1:40-49% students 0:<40% students	70%

B. Course outcome Assessment for Laboratory courses

Assessment Methods	Weights		Final Course Outcome
Continuous Internal Examination	70%	80%	
Semester End Examination	30%		
Course End Survey	20%		

The attainment of course outcome is assessed through direct evaluations as follows:

The evaluation is done in two stages viz; continuous evaluation and end semester examination. The final marks awarded to a student are based on the following criteria.

- Continuous Evaluation (15marks)

  Internal Exam -5 marks

  Day to Day evaluation-5 marks

  Record -5 marks
- End Semester examination (35 marks)

Laboratories Direct method:

Tool used	Frequency of data collection	Responsible person	Assessment criterion	Rubric for Attainment Level	Weightage
Internal Examination (Day to Day Evaluation + Record+Exam)	Once in Semester. (Day to day Evaluation & Record- During each lab session)	Lab Coordinator	Students scored > class average mark	3: >=90 students 2: 80-90% students 1: 50-80% students 0:<50%	30%

.C. Course outcome Assessment for Project Work & CSP:

As per curriculum, the students have to carry out a major project.Students are advised and encourage to identify their areas of interest in line with the recent research and development in the field of Mechanical Engineering. Projects are categorized based on their functional area and are assessed based on the content, quality, relevance and applicability. After categorizing, they will be mapped with program outcomes and programme specific outcomes and attainment levels are assessed. The marks for the individual members of the project group are awarded on the basis of evaluation done based on three presentations. The evaluation shall be done by a team of minimum three examiners including the project guide.

3.3 Attainment of Program Outcomes and Program Specific Outcomes (50) Total Marks 50.00

3.3.1 Describe the assessment tools and processes used for measuring the attainment of each of the Program Outcomes and Program Specific Outcomes (10)

Institute Marks : 10.00

A. List of assessment tools & processes (5)

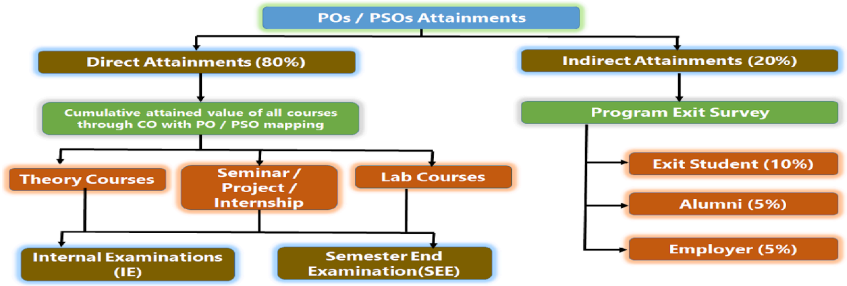
PO Assessment Procedure:

Assessment Tools and Processes

Programme outcome attainment process has been done by taking direct and indirect assessment tools.

80% of direct attainment and 20% of indirect attainment is considered for calculation of PO attainment. Direct attainment of programme outcomes and programme specific outcomes are based on the logical mapping of levels of course outcomes with programme outcomes and programme specific outcomes.

1	Assessment of COs & their Contribution to PO/PSO Attainment	80%
2	Students' Exit Survey(10%) Alumni feedback(5%) Employer feedback(5%)	20%



Direct PO Attainment Procedure:

Attainment of each PO is calculated by using the below formula

rse	COs	Attainment Weight	Attainment	PO1	PO2	PO3	PO4	PO5	PO6	PO7	PO8	PO9	PO10	PO11	PO12	PSO1	PSO2	PSO 3
	CO1	2.38	Y	3	1	1	--	--	--	--	--	--	--	--	--	3		2
	CO2	2.38	Y	3	3	2	--	2	--	--	--	--	--	--	--	3		2
11	CO3	2.38	Y	3	3	2	--	--	--	--	--	--	--	--	--	3		2
	CO4	2.32	Y	3	2	2	-	--	--	--	--	--	--	--	--	3		2
	CO5	2.32	Y	3	2	2	--	--	--	--	--	--	--	--	--	3		2
SUM(ATTAINMENT WT*EACH PO)				35.34	25.94	21.18		4.76								35.34		23.56
SUM(ATTAINMENT WT*EACH PO)/SUM(EACH PO)				35.34/15	25.94/15	21.18/15		4.76/3								35.34/15		23.56/15
PO ATTAINMENT				2.35	1.72	1.42		1.58								2.35		1.57

B. The quality/relevance of assessment tools/processes used (5)

Programme outcomes and programme specific outcomes Assessment process

- In each course, course outcomes are framed.
- Logical mapping of cognitive levels of corse outcomes with programme outcomes and programme specific outcomes are done.
- The weighted average correlation level is calculated for all programme outcomes and programme specific outcomes for each course based on the COs, and rounded off to nearest whole number 1, 2 or 3.
- Indirect programme outcome and programme specific outcome attainment values are estimated from exit survey
- Total programme outcome and programme specific outcome attainment value is the weighted sum of direct attainment and indirect attainment values.

Indirect PO Attainment Procedure:

Department Publication:

Tech ERA- Magazine:

The Department of Computer Science and Engineering has started a magazine titled " Tech ERA ". This magazine was initiated in the year 2019 and has continuously emerged as a platform to represent departmental half yearly contributions from students and faculty. The department follows well-defined.
Guidelines for the magazine " Tech ERA ". The magazine consists of original technical articles, literary articles, and trending information and technologies. Which are selected by the editor, the magazine is published twice in an academic year. The magazine committee consists of an editor and chief editor, and the editorial board consists of five (5) members of the CSE department.

Department News letter:

The Department of Computer Science and Engineering has started a newsletter in the name of "CSE GLORY," and Volume I was launched in the year 2019. It is published every Quarter yearly of an academic year. It focuses mainly on the major events organized for the year, student and faculty publications, achievements, campus placement, industrial interactions, visits, higher studies, extracurricular and co-curricular activities, and many more in the department for every semester. The department publication committee will manage the process for both the magazine and the newsletter.

Note: All the faculty whether regular or contractual (except Part-Time), will be considered. The contractual faculty (doing away with the terminology of visiting/adjunct faculty, whatsoever) who have taught for 2 consecutive semesters in the corresponding academic year on full time basis shall be considered for the purpose of calculation in the Faculty Student Ratio. However, following will be ensured in case of contractual faculty:

1. Shall have the AICTE prescribed qualifications and experience.
2. Shall be appointed on full time basis and worked for consecutive two semesters during the particular academic year under consideration.
3. Should have gone through an appropriate process of selection and the records of the same shall be made available to the visiting team during NBA visit

B.Research Laboratory:

A separate space for are search laboratory is provided for the department of Computer Science and Engineering. The research lab is well equipped and includes the following facilities:

Configuration of Computer Systems:

I5 Processor, 8 GB RAM, 1TB HDD, 18.5” LED Monitor, Optical Mouse &Keyboard, fully connected with an Internet facility, etc.

Availability of Software:

Java Developer Kit. Python, IBM Rational Rose, Morpho GraphX, SQL server, and other software supporting research work, Microsoft Virtual Server 2005 R2, Microsoft Virtual PC 2004, Mac 7.0.2, Ubuntu, Centos.

Prominent Pioneers in Computer Science
Person
Achievement
For algorithms, Goto considered harmful, the semaphore (programming), rigor, and pedagogy.
Whose huge advances in symbolic logic, such as the Calculus ratiocinator, were heavily influential on Gottlob Frege, who development of first-order predicate calculus was crucial for the theoretical foundations of computer science.
For The Art of Computer Programming series and TeX.
Invented the LISP, a functional programming language.
Devised the von Neumann architecture upon which most modern computers are based.
For founding contributions to computer science for the formulation of the Turing machine computationalmodel and for the design of the Pilot ACE.

5.8 Faculty Performance Appraisal and Development System (FPADS) (30) Total Marks 30.00

Institute Marks : 30.00

Faculty members of Higher Engineering Institutions today have to perform a variety of tasks pertaining to diverse roles. In addition to instruction, Faculty members need to innovate and conduct research for their self-renewal, keep abreast with changes in technology, and develop expertise for effective implementation of curricula. They are also expected to provide services to the industry and community for understanding and contributing to the solutions of real life problems in industry. Another role relates to the shouldering of administrative responsibilities and co-operation with other faculty, Head-ofDepartments and the Head of the Institution. An effective performance appraisal system for faculty is vital for optimizing the contribution of individual Faculty to institutional performance.

The assessment is based on:

- A well-defined system for faculty appraisal for all the assessment years(10)
- Its implementation and effectiveness(20)

The performance appraisal system of the staff is evaluate and ensure information on multiple activities appropriately captured and considered for better appraisal through the following steps

Step1:Yearly self appraisal

- Based on academic results
- Faculty achievements such as research contribution (paper publications and funded R&D projects and consultancy)
- Number of workshops and training programs conducted.
- Memberships in professional societies.
- Additional responsibilities contributing towards administration.

Step2: Student feedback on faculty.

Step3:HOD recommendations.

The outcome of the review of the performance appraisal reports

The decision taken is based on the outcome of the review of the performance appraisal reports by the management. It is conveyed by

1. One-One interaction
2. Discussions of general issues in departmental meetings

Decisions

- The increments are given at the end of the academic year.
- Knowing the status and capabilities of the faculty.
- Identify the areas in which training is required.
- Check the loop holes, if any, in the system or policies.
- Taking the output of the performance appraisal, as basis to plan for the future to ensure right man to right job.
- Enforced the training programme.
- Repositionedtheemployeesaccordingtotheirperformancesintheirrolesassignedtothem.
- Goodperformersareappreciatedandencouragedfurtherforbetterperformance.
- Reward/Award to the outstanding performers

Its implementation and effectiveness:

At the end of every academic year, the entire faculty is required to submit the filled-in Performance Appraisal form along with necessary enclosures. The Head of the Department reviews the filled-in proforma submitted by the faculty member and awards his/her evaluation marks. The Appraisal form is then reviewed by Principal. All successful faculty get a cash award and a certificate of appreciation. Those whose performance is not up to PAR are counseled and advised to attend various orientation programmes for their personal and professional development.

6.3 Laboratories: Maintenance and overall ambiance (10) Total Marks 10.00

Institute Marks : 10.00

Maintenance and overall ambience (10)

Regular Maintenance

A complaint register is maintained in all the laboratories.

If any complaints are registered by the students, then the technical staff will monitor and solve the complaint. If the complaint is not resolved, then it is registered in the maintenance register.

The system administrator will monitor and solve the issue. If the complaint is not resolved, then third parties will be involved to solve the complaint.

A regular checkup of the equipment is carried out at the end of every semester.

Trained technical staff are available for the maintenance of equipment and software.

Software required for every semester is installed at the beginning of the semester by the technical staff of the respective lab in the presence of the concerned subject faculty.

A specific maintenance slot is provided for every lab.

Chairs and tables are serviced and maintained.

Electrical maintenance items such as UPS, A/C, electrical ports, switches, network cables, lights, and fans are serviced periodically.

Breakdown Maintenance (Process of servicing)

The technical staff of the respective lab will inform the concerned authority.

The technical staff of the respective lab will check whether the issue can be solved at their level. If not, the incident is reported to the system administrator, who further looks into the complaint and tries to troubleshoot the problem. If the problem could be fixed locally, he would call his teammates and try to solve the issue.

Otherwise, the help of an external service agency is sought for repairs or replacement.

The system administrator will verify the job done and certify that the job has been carried out satisfactorily

POs Attainment Levels and Actions for Improvement- (2023-24)

POs	Target Level	Attainment Level	Observations
PO 1 : Engineering Knowledge			
PO 1	2.1	2.50	Target is Achieved.
Action 1: Plan to conduct subsequent coaching classes beyond the regular planned classes in M1 and DS OS subjects. Action 2: Bridge course were conducted before the commencement of first year to enhance the prerequisite knowledge in Engineering. Action 3: To motivate the first year students to improve on the fundamentals. Action 4: For better understanding of the basics concepts in core subjects, students are being taught lab experiments along with the theory subjects.			
PO 2 : Problem Analysis			
PO 2	2.1	2.52	Target is Achieved.
Action 1: Assignments will be framed to increase the problem-solving capabilities. Action 2: Increase the problem-solving capabilities by giving the home the needed writing work on subjects M1 and Physics. Action 3: To motivate the student to use the library and to surf the internet for problem Analysis. Action 4: Motivating students for online certification courses, Encourage to Participate in departmental club activities.			
PO 3 : Design/development of Solutions			
PO 3	2.1	2.57	Target is Achieved.
Action 1: Plan to conduct a web and user interface development workshop. Action 2: Projects will be given to students to increase their design capabilities. Action 3: Motivate students to Use UML tools to create system architecture diagrams and simulate performance with tools like JMeter. Action 4: Motivate students to explore cutting-edge technologies (e.g., quantum computing, blockchain, cloud computing) and propose novel solutions in their projects.			
PO 4 : Conduct Investigations of Complex Problems			
PO 4	2.1	2.38	Target is Achieved.
Action 1: An Emerging Technologies like AI, ML, and DL Workshop will be conducted in the next academic year. Action 2: Students will be motivated to participate in national and international conferences. Action 3: students will be motivated to do internships on using different technologies. Action 4: It is proposed to increase the target level in the next academic year.			
PO 5 : Modern Tool Usage			
PO 5	2.1	2.66	Target is Achieved.
Action 1: Plan to Introduce TensorFlow and PyTorch as core tools in lab sessions in the next academic Year. Action 2: Workshops will be conducted to improve modern tool usage capabilities. Action 3: Plan to Motivate students to contribute to open-source projects on platforms like GitHub, exposing them to collaborative tools and workflows Action 4: Plan to conduct hands-on training with modern tools such as Git, Docker, Kubernetes, TensorFlow, PyTorch, or cloud platforms (AWS, Azure, Google Cloud).			
PO 6 : The Engineer and Society			
PO 6	2.1	2.50	Target is Achieved.
Action 1: Students will be encouraged to participate in a hackathon to solve problems related to societal needs. Action 2: Students are to be given awareness of real-world problems so that they will be motivated to develop any application that will be useful for society. Action 3: Students will be Assigned a group project to develop a software solution for a local charity, requiring a report on its societal benefits and potential risks. Action 4: To motivate the students to enroll in community services units like NSS.			
PO 7 : Environment and Sustainability			
PO 7	2.1	2.58	Target is Achieved.
Action 1: Conduct of the AP State Student Convention. Action 2: Encouraging the students to participate in conferences, seminars, and workshops. Action 3: Training sessions need to be conducted to build confidence in the profession’s trustworthiness and provide greater transparency about handling their affairs. Action 4: Students are encouraged to work on projects related to environment and societal issues.			
PO 8 : Ethics			
PO 8	2.1	2.89	Target is Achieved.

Action 1: Internship talk on skill development. Action 2: Students are to be trained on communication skills so that they can convey their ideas, which will be helpful to society. Action 3: Students were trained to impart ethical principles and responsibilities as a part of class work, as every subject has its own ethics inherently in it. Action 4: Educate students about the importance of maintaining ethics in our projects design and development.			
PO 9 : Individual and Team Work			
PO 9	2.1	2.47	Target is Achieved.
Action 1: Encouraging the students to participate in conferences, seminars, and workshops. Action 2: Students were involved in teamwork, such as project work and the conduct of events. Action 3: Encouraging to participate in Techfests and Hackathons. Action 4: Innovative Teaching Learning Methodologies like Think-Pair-Share, Team assignments were implemented to nurture the teamwork of students in multidisciplinary domains.			
PO 10 : Communication			
PO 10	2.1	2.89	Target is Achieved.
Action 1: Students are to be trained on communication skills so that they can convey their ideas, which will be helpful to society. Action 2: Students were guided for technical seminars and internship presentations on communication skills. Action 3: It is proposed to increase the target level in the next academic year. Action 4: Soft skill training programs were provided for the improvement of communication and presentation skills.			
PO 11 : Project Management and Finance			
PO 11	2.1	2.84	Target is Achieved.
Action 1: Encourage the students to participate in funded agency projects to learn about project management and finance management. Action 2: Training sessions have to be conducted by industrial experts related to project management and finance and to discuss different case studies pertaining to the application of leadership qualities and managing finance in multi-disciplinary environments. Action 3: Project exhibitions will be held to encourage the students to exhibit their project management skills. Action 4: Students are motivated to take internships.			
PO 12 : Life-long Learning			
PO 12	2.1	2.13	Target is Achieved.
Action 1: A technical talk on the Artificial Intelligence and Machine Learning, Internet of Things will be organized. Action 2: Students will be encouraged to register and complete online courses from Coursera, Edx, Udemy and NPTEL. Action 3: Plan to Promote certifications (e.g., AWS, Cisco, Tensor Flow Developer) to instill a habit of credentialing and skill updating. Action 4: Students are motivated to take internships.			

PSOs Attainment Levels and Actions for Improvement- (2023-24)

PSOs	Target Level	Attainment Level	Observations
PSO 1 : Engineering Fundamentals: The ability to develop computer programs in the areas related to Algorithms, Multimedia, Web design, Big Data Analytics, and IoT to deliver a quality product for society needs.			
PSO 1	2.1	2.50	Target is Achieved.
Action 1: Students were given more analytical assignments to enhance their capabilities further to increase the POs values. Action 2: Additional classes to be conducted to introduce design subjects further to increase the POs values. Action 3: Practical approach of teaching design to be adapted. Action 4: It is proposed to increase the Attainment Level in the next academic year.			
PSO 2 : Career Development: The ability to excel in Computer Science and Engineering program through quality education, communication skills and ethics which enables them to succeed in computing industry profession.			
PSO 2	2.1	2.52	Target is Achieved.
Action 1: Seminar on Industry 4.0 and emerging technologies like AI, ML, DL using different online platforms. Action 2: Workshop on Android Application Development was conducted. Action 3: Plan to Regularly organize workshops on advanced software development tools, including cloud platforms, DevOps practices, containerization (e.g., Docker, Kubernetes), and CI/CD pipelines. Action 4: Plan to Organize internship programs, live industry projects, and hackathons that simulate real-world development environments, where students can work on building software solutions that are relevant and impactful.			
PSO 3 : Problem Solving Skills: The ability to apply standard practices and strategies in software project development using open-ended programming environments to deliver a quality product for business success.			
PSO 3	2.1	2.38	Target is Achieved.
Action 1: proposed to Organize hackathons, coding competitions, and problem-solving contests to push students to think critically and solve complex problems under time constraints. Action 2: Plan to conduct Conduct algorithm workshops that dive deep into problem-solving techniques like divide and conquer, dynamic programming, greedy algorithms, etc. Action 3: Plan to Implement group assignments or pair programming tasks where students solve problems together, share ideas, and work on solutions in tandem. Action 4: It is proposed to increase the Attainment Level in the next academic year.

Continuous Improvement through Academic Audits

The purpose of an academic audit is to enhance the quality of the education system within departments, ensuring continuous improvement in teaching and learning.

Key Areas of Academic Audit:

1. **Monitoring of Course Conduct:**

Adherence to course plans, timetables, syllabus completion, internal test standards, and evaluation processes.

2. **Student Issues:**

Identifying difficulties faced by students and recommending suitable remedial actions.

3. **Involvement in Skill Enhancement & Research:**

Assessing both faculty and student participation in skill development programs and research activities.

Internal Audits:

- **Coordinated by IQAC:** The audits are managed by the Internal Quality Assurance Cell (IQAC), with a senior faculty member as the coordinator and representatives from each department.
- **Continuous Process:** Academic audits are part of an ongoing system focused on continuous improvement.

Documents Maintained for Academic Audit:

Documents Maintained for Academic Audit:

1. **Faculty Personal Files:**

Focus on faculty quality improvement and professional growth.

2. **Course Files:**

Documents related to quality teaching, including Course files ,lab files , logbooks, and course plans.

3. **Laboratory Stock Verification:**

Ensures proper inventory and condition of laboratory equipment.

4. **Attendance Registers & Day-to-Day Evaluation:**

Tracks faculty workload and class schedules.

5. **Results Analysis:**

Helps monitor student performance and progress.

6. **Student Success Documentation:**

Includes details about placements, higher education, and competitive exam achievements.

7. **Student Feedback:**

Provides insights into teaching effectiveness, aiding continuous improvement.

8. **Counseling & Mentoring Registers:**

Documents the support provided by faculty counselors and mentors to students.

9. **Professional Activity Documentation:**

Records of guest lectures, seminars, workshops, and conferences that contribute to students learning beyond the curriculum.

10. **Co-curricular & Extra-curricular Activities:**

Tracks student participation in activities that enhance critical thinking, communication, and collaboration skills.

Frequency of Audit

S. No	Activity of Audit	Frequency	Outcome
1.	Syllabus Coverage	15days	The faculty who are not completed the course syllabus as per lesson plan or in the prescribed time. So that accordingly to inform that faculty take additional hours to complete the course in the stipulated time.
2.	Course Files	Every month	Course file monthly status identifies the faculty handling the course properly or not. If not, senior faculty may help them to complete the course
3.	Faculty Personal Files	Yearly	Personal file status gives the faculty growth in terms of academic, research activities. if not, encourage the faculty to attend FDP'S and also for higher education
4.	Lab Files	Monthly	Lab file monthly status identifies the faculty handling the lab properly or not. If not, senior faculty may help them to complete the lab
5.	Timetable File	Semester	Which shows the faculty work load based on faculty recruitment required or not
6.	Examinations File	Yearly	Based on the results what measures or steps are required to improve the pass percentage
7.	Placements File	Yearly	Which gives the data how many of the students are skilled after completion of the course. Based on that that add the new courses to the program or new course objectives to be add to the course to enhance the percentage of skilled students

KAKINADA-533 003. ANDHRA PRADESH, INDIA
(Established by Andhra Pradesh Act No.30 of 2008)

Proc. No. JNTUK/DAA/B1/Permanent Affiliations/Online Verification/FFC Visits/2023-2024 30.06.2023

Sub: JNTUK Kakinada –DAA– Grant of Permanent Affiliations for the Academic Year 2023-2024 - Constitution of Fact Finding Committee Teams for **Online Verification of Data**–Reg

O R D E R:

The Honourable Vice-Chancellor JNTUK Kakinada is pleased to constitute the following Fact Finding Committee Team **to verify Online, the data submitted by the following Affiliated College**for considering the Grant of **Permanent affiliation**for running UG & PG coursesfor the Academic year 2023-2024.

Committee Members	Details of the College	Inspection Date
Member 1 **Dr. A.M. Prasad** Professor of ECE& Director, Admissions, JNTUK **Member 2** **Dr.K. Ramu** Professor of Civil Engineering, UCEK **Member 3** **Dr.G.P. Raju** Assoc. Professor of Physical Education, UCEN	Sri Vasavi Institute of Engineering & Technology, Pedana (CC-MQ)	**03-07-2023**

NB:

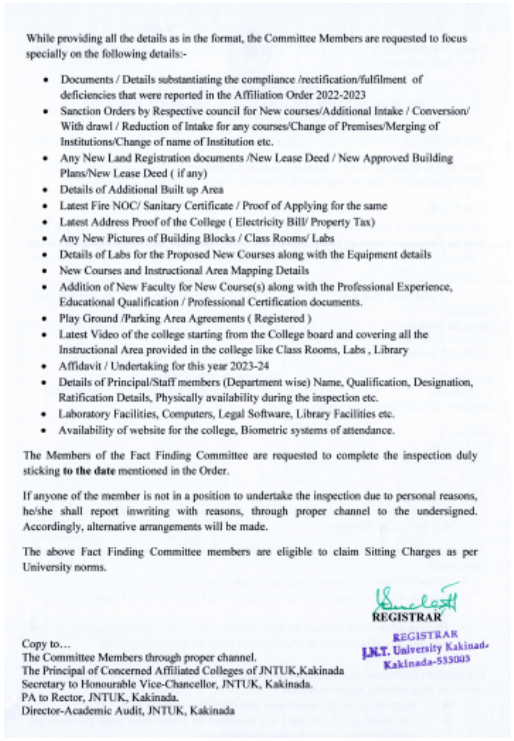
- **The Principals of the respective colleges are informed to create online link and share it to FFC Team Members.**

As per the directions, the members of FFC Team shall follow the following instructions scrupulously.

- All the Institutions have already uploaded information to (https://affiliation.apcfss.in/)
- Members of Fact finding committee shall go through the consolidated report uploaded by the college.
- **The committee shall upload the FFC report Online** (https://affiliation.apcfss.in/) **on the same day of inspection or within 2 days from the date of inspection.**

The members of the team are requested to submit the following to the Director Academic Audit within two days from the date of inspection.

- Hardcopy of the uploaded report with attestation on every page.
- The members of the team are requested to submit hard copy of report on additional Information **(Enclosed Annexure A)**



While providing all the details as in the format, the Committee Members are requested to focus specially on the following details:-

- Documents / Details substantiating the compliance /rectification/fulfilment of deficiencies that were reported in the Affiliation Order 2022-2023
- Sanction Orders by Respective council for New courses/Additional Intake / Conversion/ With drawl / Reduction of Intake for any courses/Change of Premises/Merging of Institutions/Change of name of Institution etc.
- Any New Land Registration documents /New Lease Deed / New Approved Building Plans/New Lease Deed (if any)
- Details of Additional Built up Area
- Latest Fire NOC/ Sanitary Certificate / Proof of Applying for the same
- Latest Address Proof of the College (Electricity Bill/ Property Tax)
- Any New Pictures of Building Blocks / Class Rooms/ Labs
- Details of Labs for the Proposed New Courses along with the Equipment details
- New Courses and Instructional Area Mapping Details
- Addition of New Faculty for New Course(s) along with the Professional Experience, Educational Qualification / Professional Certification documents.
- Play Ground /Parking Area Agreements (Registered)
- Latest Video of the college starting from the College board and covering all the Instructional Area provided in the college like Class Rooms, Labs , Library
- Affidavit / Undertaking for this year 2023-24
- Details of Principal/Staff members (Department wise) Name, Qualification, Designation, Ratification Details, Physically availability during the inspection etc.
- Laboratory Facilities, Computers, Legal Software, Library Facilities etc.
- Availability of website for the college, Biometric systems of attendance.

The Members of the Fact Finding Committee are requested to complete the inspection duly sticking **to the date** mentioned in the Order.

If anyone of the member is not in a position to undertake the inspection due to personal reasons, he/she shall report inwriting with reasons, through proper channel to the undersigned. Accordingly, alternative arrangements will be made.

The above Fact Finding Committee members are eligible to claim Sitting Charges as per University norms.

SNO.	Representation	Trend Description
1.		Decrease in companies visited in the academic year 2021-22 and 2023-24 due to recession in the market.
2		Decrease in companies recruited in the academic year 2023-24 due to recession in the market.

3		Average CTC is observed to be decreased as no of placements are decreased
4		Placement opportunities decreased due to recession in the market.
5		Decrease in companies recruited in the academic year 2023-24 due to recession in the market.

6		Decrease in IT and ITES companies recruited in the academic year 2023-24 due to recession in the market.
7		Decrease in the No. of Higher studies in the academic year 2021-22 due to high recruitment in the companies, and in the academic year 2023-24 due to not interested in higher studies.
8		Decrease in Highest CTC in the academic year 2023-24 due to recession in the market.

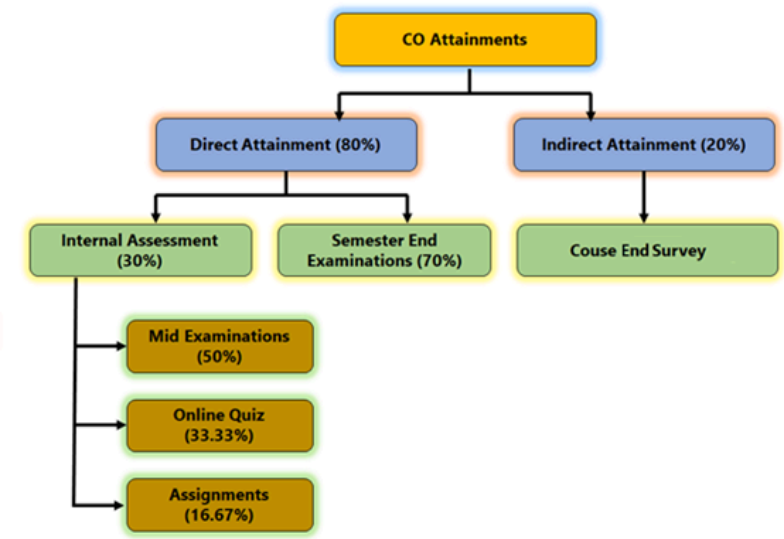
Procedure for Attainment of Cos



A. List of assessment processes (1)

Procedure for COs Assessment:

Assessment Tools and Processes :

A. Course Outcome Assessment for Theory Courses

Assessment Methods	Weights		Final Course Outcome
Continuous Internal Examination	70%	80%	
Semester End Examination	30%		
Course End Survey(CO Feedback)	20%		

The attainment of course outcome (CO) is assessed through direct and indirect evaluations. The direct attainment is measured based on the performance of the students in the internal and external examinations. TheCourse end surveyquestionnaireispreparedbytheCourseinstructorinconsultationwiththe Program Coordinator. The indirect attainment is measured based on course end survey. The Course end survey questionnaire consisting of all course outcomes is distributed to the students at the end of everysemester.The Survey reports are assessed with a rating of 3 for excellent, 2forGood, 1 for Poor.The average of the ratings obtained from course end survey will be taken on 3 points scale. By taking the weighted average of internal, external and course end survey the final co assessment is calculated.

For Theory & Mandatory Courses:

Direct Attainment for subjects:

S.No	Assessment Method	Marks Weightage
1	Mid	15(50%)
2	Assignment	5(10%)
3	Online	10(10%)

Course End Survey	20%		

The attainment of course outcome is assessed through direct evaluations as follows:

The evaluation is done in two stages viz; continuous evaluation and end semester examination. The final marks awarded to a student are based on the following criteria.

- Continuous Evaluation (15marks)

  Internal Exam -5 marks

  Day to Day evaluation-5 marks

  Record -5 marks

- End Semester examination (35 marks)

Laboratories Direct method:

Tool used	Frequency of data collection	Responsible person	Assessment criterion	Rubric for Attainment Level	Weightage
Internal Examination (Day to Day Evaluation + Record+Exam)	Once in Semester. (Day to day Evaluation & Record-During each lab session)	Lab Coordinator	Students scored > class average mark	3: >=90 students 2: 80-90% students 1: 50-80% students 0:<50%	30%
University Examinations	Once in Semester	University appointed Examiner	Students scored > class average mark	3: >=90 students 2: 80-90% students 1: 50-80% students 0:<50%	70%

POs Attainment Levels and Actions for Improvement- (2023-24)

POs	Target Level	Attainment Level	Observations
PO 1 : Engineering Knowledge			
PO 1	2.10	2.55	Target level attained
1.Bridge Course was conducted before the commencement of first year to enhance the prerequisite knowledge in engineering. 2.Conducted problem oriented Tutorial classes 3. Remedial classes for weak students 4.Organized practical classes to improve understanding Basic Sciences			
PO 2 : Problem Analysis			
PO 2	2.10	2.21	Target level attained
1.Conducted Tutorial sessions to solve Engineering problems 2.Increase the problem solving capacities by giving practice on Mathematics and Physics. 3.To motivate the students to use library and internet for problem analysis. 4.Motivate the students for doing online certificate courses.			
PO 3 : Design/development of Solutions			
PO 3	2.10	2.35	Target level attained
1. To organize various Engineering fests to make students aware about new designs 2. To organize cultural events to make the students aware about cultural and social importance 3.Plan to conduct workshop on advanced technologies.			
PO 4 : Conduct Investigations of Complex Problems			
PO 4	2.10	2.20	Target level attained
1.Assigned some Extra problems to students and ask them to solve in Tutorial and lab sessions to facilitate deep understanding of subject 2.Encourage to participate in seminars and give presentations 3.Motivate the students to participate in workshops.			
PO 5 : Modern Tool Usage			
PO 5	2.10	2.21	Target level attained
1. Students are encouraged to use design thinking approach for providing alternate solutions to selected Engineering problems 2. Planned to conduct workshops to improve modern tool usage capacities.			
PO 6 : The Engineer and Society			
PO 6	2.10	2.7	Target level attained
1.Expert sessions on professional Ethics 2.Expert sessions on Duties and responsibilities of Engineer's in the Society 3.To motivate the students to enroll in the community services unit like NSS.			
PO 7 : Environment and Sustainability			
PO 7	2.10	2.53	Target level attained
1.Conducted social service activities as a part of NSS 2.Conducted sessions on sustainable Engineering 3.Conduct of the AP State student convention.			
PO 8 : Ethics			
PO 8	2.10	2.56	Target level attained
1. Students are motivated and made aware about the demands of Engineering profession and importance of Honest and Ethics 2.To train the students on communication skill so that they can convey their ideas which will be helpful to society. 3.Educate the students about the importance of maintaining ethics.			
PO 9 : Individual and Team Work			
PO 9	2.10	2.15	Target level attained
1.Conducted team based social service activities 2.Students are Encouraged to participate in group activities as member or leader. 3.Innovative Teaching Learning Methodologies like Think-Pair-Share, Team assignments were implemented to nurture the teamwork of students in multidisciplinary domains.			

PO 10 : Communication

PO 10	2.10	2.61	Target level attained
1.Expert Lecture in communication Skills 2.Sessions in language lab 3.It is proposed to increase the target level in the next academic year. 4.Soft skill training programs were provided for the improvement of communication and presentation skills.			

PO 11 : Project Management and Finance

PO 11	2.1	3	Target level attained
1.Class on Engineering Ethics to be followed 2.In Technical management Responsibility given to students in various technical events			

PO 12 : Life-long Learning

PO 12	2.10	2.09	Target level not attained

9 STUDENT SUPPORT SYSTEMS (50) Total Marks 50.00

9.1 Mentoring system to help at individual level (5) Total Marks 5.00

Institute Marks : 5.00

A. Details of the mentoring system that has been developed for the students for various purposes and also state the efficacy of such system (5)

Mentoring system to help at individual level:

Counseling is an important part of all educational institutions. In this practice students and staff can resolve outstanding negative situations and improve upon positive aspects. Student mentoring is an integral part of the organization. A mentor is the teacher who shares his knowledge and experiences while bringing the students (mentees) up the ranks. The system of mentoring is followed in every department with the primary objective of providing reliable and constant support to the mentees in order to excel in both personal and professional life.

Objectives of the Mentoring System

- To help students understand the challenges and opportunities present in the institute and develop a smooth transition
- To counsel the students on how to cope with academic, non-academic, and personal problems
- To provide positive role models to undergraduate students of the Institute
- To proactively identify problems with the students and bring them to the attention of the authorities concerned.

Figure 9.1.1 Levels in mentoring system

Benefits of the Mentoring System

- It support mentees advancement in research activity, conference presentations, publications, and pedagogical skills.
- Mentoring provides resources for dealing with stressful or difficult periods in their graduate careers.
- Mentors, with their experiences and networks, help improve the students "prospects of securing professional placement.
- Mentoring can help the students lower their stress and build confidence.
- Constant interaction with a mentor will promote students" engagement in the field through active participation.

Types of Mentoring Professional Guidance

The departments are well equipped with knowledgeable human resources in the form of faculty members who, by keeping themselves abreast of the latest developments, offer guidance to prospective professionals in addition to classroom teaching. The industry-institute partnership cell and the entrepreneurship development cell have been putting efforts in this direction.

Career Advancement

The Training and Placement Cell has been active not only in arranging campus recruitment drives but also in offering awareness and training for the students.

Coursework

The mentor and members of the faculty handling different courses interact with students to clarify all their doubts in their respective courses.

Lab-Specific

Each of the lab sessions is handled by two teachers in order to have special care for the students while the experiments are being handled. A demonstrative presentation is given by the teacher concerned before every experiment. The laboratory records are evaluated after the experiment is held. In other words, there is active involvement of the members of the faculty at the pre-experiment stage, at the time of the experiment, and after the experiment.

Mentoring Process

- Students are assigned to a counselor or mentor whose role is to be a point of contact for advice and guidance.
- Mentors will listen, advise, and refer mentees to higher authorities if necessary.
- It provides reflection and support for the students" academic development while they are doing their course. It promotes other activities and experiments related to the career and personal development of students.
- Provides guidance on career development.
- Helps the students to settle down in their respective courses.
- Students requiring additional help are identified, and their progress is monitored regularly.
- In the mentoring system, a proctor diary is maintained for each student, where the following details are provided:
- Personal Information
- Previous Record
- Academic Performance in Competitive Examinations
- Details of Internship and Industrial Training Scholarships Received
- Co-curricular and extra-curricular activities
- The mentors meet the students periodically and monitor their performance and activities.Guidance regarding the lagging issues is provided.Occasionally,a proctor meeting is conducted with the parents based on the requirement

- Feedback collection process: Online-ECAP (Engineering College Automation Package) software.
- Eligibility of the percentage of students to give feedback: 100%

Introduction

The teaching-learning system followed by any educational institution needs continuous refinement. To facilitate this process of continuous refinement, the institution has adopted a feedback system that takes suggestions from students in each program. This eventually helps to fine-tune the teaching-learning process and the curriculum. The institution follows a well-defined and formal Feedback system. The feedback system has been identified as one of the important processes in our quality management system.

Specify the feedback collection process.

- Collecting feedback for all the courses/faculty that are being taught, twice in a semester through the ECAP software.
- The students "feedback collection process is described in the flow chart in the figure 9.2.1.
- Once the feedback collection process is completed ,the reports are generated automatically.
- The consolidated report containing feedback percentage for each faculty is sent to the respective heads of the departments, and the information is circulated to the faculty of the department for necessary action.

Process Steps for Students Feedback

Step 1:Enter the E-Cap URL:http://103.208.229.211/newecap/Default.aspx

Step 2: Login with your ID and password.

Step 3: Click on Academics.

Step 4: Select the feedback system option.

Step 5: Select the staff feedback system option.

Step 6: After selecting the staff feedback, select any one of the levels corresponding to each parameter for particular subjects.

Step7: RepeatStep6for all current semester courses.

Step8: After the completion of all current semester courses, save the details.

Step 9: Logout.

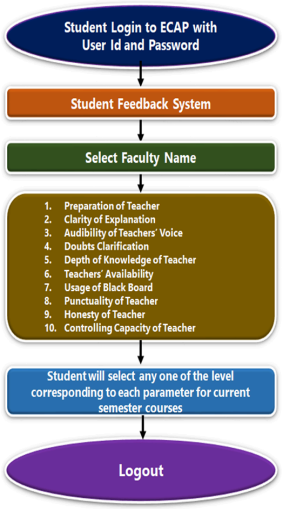

Figure 9.2.1: A Flow Chart for Student Feedback Processing Steps in ECAP (Online)

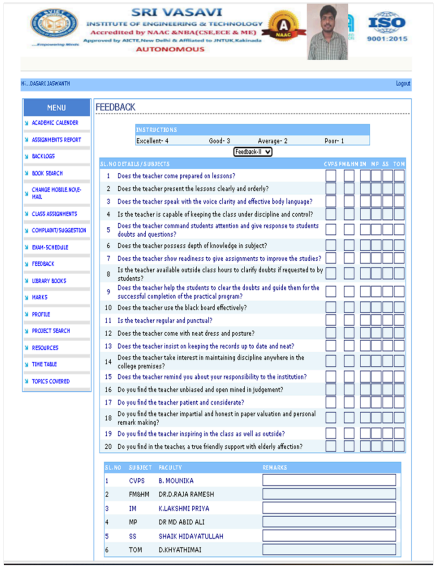

Figure 9.2.2: Format of Student Feedback on Faculty

Specify the feedback analysis process.

- The feedback analysis is done manually.
- The feedback collected from students is first analyzed at the level of the HOD and then at the level of the principal.
- The contents of the feedback will be shared personally with each faculty member based on the parameters in the questionnaire and their metrics of measurement in the given format.
- Based on the separate parameters, the feedback given by the faculty is taken from the students and the average is calculated.
- The faculty member who gets less than 75% average in the feedback is identified by the HoD, and he or she will be asked to submit an explanation to him.

Basis of Reward

- The feedback system works as an eye-opener for the faculty members.
- The increments and promotions are given based on a scale of 4 for student feedback in the faculty appraisal form.
- Those with low scores will be counseled and asked to improve their performance in the subsequent semesters by taking help from senior and experienced teachers or attending pedagogical training or other faculty development programs as per necessity.

- The faculty members are constantly motivated by giving a word of appreciation in the departmental meetings.

Corrective Measures

1. Normally, the feedback of the students is used to improve the performance of the faculty members.
2. Regular training programmers' in collaboration with NITTTR and FDPs by experts from industry and academia are organized every year to train the faculty members in teaching methodologies and e teaching-learning process.
3. Apart from this, the faculty members are encouraged to attend various faculty development programmes (FDPs) seminars and workshops to hone their skills.
4. If needed, explanation from the faculty will be demanded for any inappropriate result, and subsequent action will be taken to improve the performance of the faculty member.
5. Counseling will be given to the faculty concerned by the HOD and principal whenever required.

Respected Madam,

I'm happy to share that students have provided positive feedback regarding your teaching in DATA COMMUNICATIONS. This feedback highlights your clear explanations, engaging lectures.

Your dedication to student learning is truly appreciated. Your positive impact on students is evident in the feedback, which speaks volumes about your teaching effectiveness.

Best regards,
Dr. B. Raja Srinivas Reddy

Institute Marks : 5.00

A. Feedback collection, analysis and corrective action (5)

Feedback on facilities

- The aim of the college is to provide the best facilities for the students.
- Student's feedback on facilities is collected from the students through online.
- Feedback is collected from all the student twice in an academic year.
- The students do not disclose their identities while giving feedback.

The feedback is collected in the following fields:

Infrastructure: classrooms, laboratories, and Internet facilities. In interactions with HoD and class teachers held three times a semester, students provide feedback on any issues related to classrooms, lab equipment, etc., which is passed on to the authorities concerned and rectified.

Library: Library committee meetings are held three times a semester, where faculty and students provide feedback on the adequacy of titles and volumes of books and e-learning facilities. Appropriate corrective actions are taken to rectify deficiencies whenever they are pointed out.

Housekeeping: Students and faculty provide feedback on various aspects of housekeeping at class committee meetings and other occasions like department meetings and HOD meetings, which is passed on to the maintenance department and problems are sorted out.

Transport: Any issues related to the adequacy and punctuality of buses that are brought forth by students or faculties are passed on to the transport department, and corrections are made.

Hostel: Hostel committee meetings are held at department level where hostellers raise problems, if any, related to hostels. Also, HoDs and teaching and non-teaching staff visit hostels on a daily basis and provide feedback on the food and other maintenance-related issues, if any. These are brought to the attention of the wardens and maintenance department and rectified immediately. Anti-ragging squads consisting of teaching staff visit all hostels every evening and interact with students to inform themselves of any issues. If any complaints are received, they are immediately addressed.

Others: Any grievances related to food, bank facilities, medical facilities, etc., when reported to the faculty, dean, or principal, is solved immediately. In addition, feedback is collected from students and alumni during alumni meetings and annual general body meetings on all the above areas. Feedback analysis is done, and corrective actions are taken. Feedback is collected from the parents during admissions to know their expectations. Feedback is also taken from the industry. Based on their feedback, bridge courses and value-added courses are arranged to bridge the gap between curriculum and industry. Also, MOUs are signed, and guest lectures, seminars, workshops, and industrial visits are arranged for the students.

From the collection of students" feedback, the following analysis is made, and necessary corrective and improvement actions are taken:Following is the process of providing feedback on facilities.

- Feedback Collection Process
- Feedback Analysis
- Corrective Measures

Feedback Collection Process

Steps in the online feedback collection process from students and faculty:

Step1: Google Forms Will be sent to the students WhatsApp groups .

Step 2: Responses will be collected

Step3: Analysis on the feedback will be done by the responses sheets.

2	Library facilities	The committee advised to allocate library hours in the time table for the students and take steps for functioning of the library beyond college hours. Also remote learning access is Provided to Knimbus, Delnet and e-cap soft wares.

Step-by-step feedback collection process from industry Personnel, Alumni, or Parents:

1. Step 1: The coordinator will give feedback forms to industry persons, alumni, or parents at the time of the vis it (advisorycommitteemeetings,guest lectures, collection fcertificates,andalumni meets).
   Step2: Feedback on facilities filled by the stakeholders for all facilities by using one of the levels

   Step3:After completion of the form, the coordinator will collect the data for analysis.
2. Feedback Analysis

   The collected feedback is scrutinized by a committee with representation from each department. The details of the obtained feedback are thoroughly analysed by a group of committee members. The committee takes appropriate decisions.
3. Corrective Measures

- All washrooms are renovated.
- Additional blocks were constructed for the girls hostel.
- Anew shed has been provided in the parking area.

- Additional buses are provided on new routes.
- CC cameras are provided in all corridors and through out the entire campus for the girl safety and security.
- The necessary corrective measures are implemented after discussion with the management. A review is conducted by the principal to check on the corrective measures taken and whether they need to be continued.

Library Facilities and Services

- SVIET Central Library automated using E-CAP: Engineering College automation package.
- Library created its resources database and provided Online Public Access Catalogue (OPAC) through which users can access from any of the computers connected in the campus LAN to know available resources and the status of the book https://103.208.229.211/newecap/default.aspx
- The library is a member of DELNET and provides web access to e- resources that includes journals, text books, thesis's/ dissertations
- Established the NPTEL Local Chapter in association with IIT Madras. Through this,
- NPTELhas been offering online certification for its courses, the highlight being the certification exam through which the student gets an opportunity to earn a certificate from the IITs.

B. The institution needs to specify the facilities, materials for learning beyond syllabus, Webinars, Podcast, MOOCs etc. and demonstrate its effective utilization (3)

Web-based Learning Facilities:

- The institute has created central internet facility 100Mbps speed leased line and 20 computer terminals facility to promote and motivate students to self -learning.
- The Internet is an open information system in which various sources of information, media and materials such as texts, images, video sequences can be linked together in diverse ways to form so-called self-learning environments.
- Internet offers new possibilities to structure, represent, adapt and integrate various learning content and materials. Furthermore, due to its interactivity, learners can process thematerial in accordance with their individual preferences and strategies at anytime and from any place provided an internet connection is available.
- Faculty members suggest different sources for each subject.
- Faculty members prepare their course files and place them in college website.

Learning with Multimedia Facilities

- Availability of course material on intra-net
- Digital library facility
- Language lab facility
- Availability of video lectures
- LCD projectors for presentation

NPTEL Local Chapter Statistics

- NPTEL (National Programme on Technology Enhanced Learning) provides E-learning through online Video and Web courses in Engineering, Sciences and Humanities streams.
- The objective is to enhance the learning component of all Engineering aspects including Electronics & Communication Engineering aspects of some of the current learning methods.

- Having access to 24,707 video courses of NPTEL – view, download and copy.
- Through local chapter NPTEL has initiated Open online courses that have certification as an option. 10hr, 20hr and 30hr courses are offered on the model of MOOCs on the online courses portal.
- The objective of enabling students to obtain certificates for courses is to make students employable in the industry or pursue a suitable higher education program.

Career Guidance, Training and Placement Cell:

The standard of any educational institution is generally measured by its academic excellence and the success in placements. To be able to get placed in various companies, students are required to have a good grip and proficiency in Aptitude, Reasoning, Verbal and Communication Skills.

It is to meet this vital requirement and the competitive standard and achieve this target,

the Training placement & Career Guidance Cell was established with team of potential and Professional trainers in the areas of Aptitude, Reasoning, verbal and Soft Skills.

The prime objective of the Training and Placement Career Guidance Cell is to create premier opportunities for the SVIET students by promising jobs in reputed organizations. To accomplish this objective, the Placement Cell identifies corporate companies in various sectors and initiates the process of building a mutually rewarding relationship with them. The Placement Cell has been instrumental in associating itself with corporate giants to conduct various Industry Institute initiatives.

Various technical and literary events are conducted to practically enhance their communicative abilities and to equip them also with a holistic potential which will help them to face emerging challenges in the context of globalization. Over the time it has proved itself most successful with outstanding success in the ascendance of

success in placements.

1. FUNCTIONS OF THE TRAINING CELL:

1. Collects and maintains the students' database for the purpose of T&P activities

2. Enables the training need analysis for all the students basing on the same, plans for

Imparting the necessary skills such as soft skills and technical skills.

3. Arranges for an interaction with industry and bridges the gap between Institute and industry.

4. Arranges the special sessions for providing the contemporary trends and developments

in the technology and tools to the students

5. The Training Cell conducts lectures on personality development, communication skills

and conducts mock sessions for improving presentation skills.

6. Assists companies in the recruitment process by conducting interviews, group

7. Discussions, Written tests etc. in the Campus. Training given exclusively to the students

for the MNC's

PLACEMENT CELL:

8. Collects and maintains the students' database for the purpose of Placement activities

9. Holds the responsibility for identifying placement opportunities across reputed Organizations.

10. Inviting the corporate companies to the College Campus for recruitments

11. Coordinates with Training Head for identifying the training requirements related to Soft

and communication skills

12. Conducts Campus Drives with help of department coordinators and volunteers

CAREER GUIDANCE CELL:

13. To give training and guidance to students on career related matters and assist them

in exploring new opportunities.

14. To organize Career guidance and motivational lectures by Alumni, entrepreneurs, External guests and faculty

National Service Scheme (NSS)

SRI VASVI INSTITUE OF ENGINEERING AND TECHNOLOGY, National Service Scheme (NSS) Unit No. 90214703C enrolls 250 NSS volunteers every year. The National Service Scheme (NSS) is an Indian government-sponsored public service program conducted by the Department of Youth Affairs and Sports of the Government of India. Popularly known as NSS, the scheme was launched in Gandhiji"s Centenary year, 1969. Aimed at developing students personality through community service, NSS is a voluntary association of young people in Colleges, Universities, and at +2 levels working for a campus-community linkage.

The cardinal principle of the NSS program is that it is organized by the students themselves, and both students and teachers, through their combined participation in community service, get a sense of involvement in the tasks of nation-building. Motto: "SERVE THE NATION."

SRI VASAVI INSTITUTE OF ENGINEERING AND TECHNOLOGY NSS Committee has been constituted With The following members

Table9.7.1.4: NSS Activities for the Academic Year 2023– 24

S.No.	Date	Name of the Activity	Description

01	21-06-2023	National Yoga Day Rally	The NSS Unit of SRI VASAVI INSTITUTE OF ENGINEERING AND TECHONOLOGY, NANDAMURU celebrated International Yoga Day, on June 21st, it is a global platform uniting people to promote yoga for physical, mental, and spiritual well-being. Originating in India, yoga fosters harmony between mind and body, and the day celebrates its transformative power and benefits.
02	10-08-2023	TIRANGA District Level Competitions	The NSS Unit of SRI VASAVI INSTITUTE OF ENGINEERING AND TECHONOLOGY, NANDAMURU. Tiranga Celebrations are organized in the college on 10-08-2023 from 10.00 A.M.The Indian National Flag represents the hopes and aspirations of the people of India. It is the symbol of our national pride. Over the last five decades, several people including members of armed forces have ungrudgingly laid down their lives to keep the tri-colour flying in its full glory.
03	26-08-2023	Mega Tree Plantation	The NSS Unit of SRI VASAVI INSTITUTE OF ENGINEERING AND TECHONOLOGY, NANDAMURU. Mega tree plantation initiatives, like the "Ten Billion Tree Tsunami" in Pakistan, are vital for combating climate change and restoring ecosystems, but require careful planning and community involvement to ensure success and avoid unintended consequences. These large-scale projects aim to sequester carbon, improve air quality, and enhance biodiversity, but must also address land rights and resource access to be truly sustainable.
04	27-09-2023	Blood Donation Camp	The NSS Unit of SRI VASAVI INSTITUTE OF ENGINEERING AND TECHONOLOGY, NANDAMURU. Blood donation is harmless and safe in the body. Rather, it is a social responsibility. The donor is donating for it as it will be used in saving lives of his fellow beings. He himself may use the same during his own need. MILLIONS OF people owe their lives to people whom they will never know or meet in their lifetime.

05	28-09-2023	Blood Grouping Camp	The NSS Unit of SRI VASAVI INSTITUTE OF ENGINEERING AND TECHONOLOGY, NANDAMURU. The event focused on educating the public about the importance of blood donation, the different blood groups, and the process of blood typing and donation. Trained medical personnel were present to conduct blood grouping tests and collect blood samples from willing donors. The camp also provided refreshments and rest areas for donors, ensuring a comfortable and safe experience. The success of the camp was evident in the positive response from the community, with many people expressing their willingness to donate blood and learn more about blood donation. The collected blood samples were sent to a local blood bank for storage and distribution to patients in need. This event served as a valuable reminder of the critical role blood donation plays in saving lives and strengthening community health.
06	11-10-2023	Amrit Kalash Yatra	The NSS Unit of SRI VASAVI INSTITUTE OF ENGINEERING AND TECHONOLOGY, NANDAMURU. Meri Maati Mera Desh (MMMD) campaign was kick started on 9th August 2023 encouraging people to pay their tributes to the Veers and Veeranganas who dedicated and sacrificed their lives for the nation. The campaign unfolded at Panchayat/Village, Block, Urban Local Body, State and National levels inviting people from across the country to participate in Meri Maati Mera Desh campaign through various activities such as construction of Shilaphalakams, creation of Amrit Vatikas, tree plantation, Veeron ka Vandan, and Panch Pran ceremony. After the huge success of phase one of MMMD, the second phase of MMMD campaign was launched on 1st September 2023 encouraging people from each District/Village to take part in Amrit Kalash Yatras. Amrit Kalash yatra was organized on 11th October 2023 in Nandamuru village.

07	31-10-2023	National Unity Day	The NSS Unit of SRI VASAVI INSTITUTE OF ENGINEERING AND TECHONOLOGY, NANDAMURU. In **1984**, the Indian Government first declared to celebrate the birthday of Swami Vivekananda i.e. 12th January as National Youth Day. Since then the day has been celebrated as National Youth Day all over the country. The governments main aim is to make a better future for the country by motivating the youths through the way of their life and ideas of the Swami Vivekananda. It is a great way to wake up the eternal energy of the youth as well as to make the country develop. National Youth Day is also known as **Rashtriya Yuva Diwas** and is celebrated on the birth anniversary of Swami Vivekananda. The day creates awareness and provides knowledge about the rights of people in India. It is a day to educate people to behave properly in the country. The main objective behind the celebration is to make a better future for the country by motivating the youth and spreading the ideas of the Swami Vivekananda. National Youth Day is also famous as Yuva Diwas.
08	16-11-2023	AP Disha App Installation Camp	The NSS Unit of SRI VASAVI INSTITUTE OF ENGINEERING AND TECHONOLOGY, NANDAMURU. The DISHA app, developed by the Andhra Pradesh police, is a crucial tool for womens safety, allowing users to send SOS alerts to the police control room and designated contacts by shaking their phone or pressing a button, and also features "Track My Travel" for enhanced safety.
09	01-12-2023	AIDS Day Awareness Rally	The NSS Unit of SRI VASAVI INSTITUTE OF ENGINEERING AND TECHONOLOGY, NANDAMURU. AIDS is primarily HIV or the Human Immune deficiency Virus. This virus replicates itself into the human body by inserting a copy of its DNA into the human host cells. Due to such property and capability of the virus, it is also known as a retrovirus. The host cells in which the HIV resides are the WBCs (White Blood Cells) that are the part of the Human Immune system.

The seminar gave a total awareness on Breast Cancer through the charts, videos and such other visual aids. The seminar discussed and clarified the doubts regarding the topic. A medical check-up was also a part of the program. The college participated in large numbers and could easily discuss their issues,ask for assistance and guidance regarding various issues.
13	05-03-2024	NariShakthi Fitness Camp	The NSS Unit of SRI VASAVI INSTITUTE OF ENGINEERING AND TECHONOLOGY NANDAMURU In Indian culture, women are an embodiment of power, Shakti and are the pillars of their families and communities. Yet, only a fraction of them prioritizes their own well-being, with limited awareness about the need for fitness. Every woman of the country needs to be fit, strong, healthy, and empowered to enable their contribution towards the vision of Viksit Bharat. The NariShakti Fitness Runs aim to ignite a desire of self-care, unleashing the Shakti within each woman, and creating a ripple effect of positive change that benefits families, communities, and the nation as a whole. In 2024, the International Women's Day is being celebrated on 8th March under the theme Invest in women: Accelerate progress", for the 50th time since its inception in 1975. In commemoration of the same, 25 women from each block will participate in the Nari Shakti Fitness Runs of 500m in each of the 6618 blocks of the country on 9 th March, 2024. These runs will also mark the grand finale of the block level sports meets being conducted by the NYKS across the country.

10.2.1 Adequacy of budget allocation (10)

Institute Marks : 10.00

A. Quantum of Budget Allocation for Three Years (5)

B. Justification of Budget allocated for Three Years (5)

The yearly budget is prepared according to the needs & requirements of the departments taking into consideration of annual intake of students, laboratory & infrastructure developments, Students, faculty &staff requirements and promotions and latest technologies etc. Various departments submit the annual budget to principal. On receipt of such proposals, Principal, in consultation with departmental HODs, prepares a consolidated proposal. After deliberations, formal budget made altered in departments and forwarded to Principal for preparing final budget at college level and submit it to the Governing Body for approval and sanction. The Management is approving almost 100% which was proposed by the institute. The budget allocation and utilization for the last three years is adequate. All the expenditure needs prior approval from the competent authority. Funds would be spent only from the approved budget. If funds are required for expenses not mentioned in the proposal, management’s approval is a must.

10.3.1 Adequacy of budget allocation (10)

Institute Marks : 10.00

A. Quntum of budget allocation for three years (5)

B. Justification of budget allocated for three years (5)

The allocated budget was used to meet the new facilities, equipment, replacement of out-dated equipment and new labs due to revision in syllabi. Budget requirements under recurring and non-recurring heads are collected from departments before the commencement of the financial year.

Allocations are made as per the availability of funds. Spending is monitored by the accounts section. The institution carefully monitors the expenses so that the necessities are met without affecting the smooth working of the institution. The finance committee has been very efficiently doing this over the past several years that the institution never had any serious budget crunch that affected the functioning of the college.

The sample table shows the details of adequacy of budget allocation for the last three years for the department of Computer Science Engineering.

10.3.2 Utilization of allocated funds (20)

Institute Marks : 20.00

A. Budget utilization for three years (5)

Funds are allocated by the Management of the College. Department Heads are intimated of the extent of funds allocated against their budget proposals. Actions for procurement of lab equipment, up-gradation of existing lab facilities, purchase of consumables, etc. are initiated from the department and the funds are released on a case by case basis from the accounts office of the college on approval by the Management. During the last three years, the budget was utilized to meet expenses like purchase of equipment, expenses towards consumables and contingencies, etc. The Table shows the percentage of funds utilization for the last three years for the department of Computer Science Engineering.

10.4.2 Internet (10)

Institute Marks : 10.00

Name of the Internet provider	RAILTEL,BSNL
Available band width	RAILTEL : 100MBPS ,BSNL: 200MBPS
WiFi availability	YES
Internet access in labs, classrooms, library and offices of all Departments	YES
Security arrangements	YES

Annexure I

(A) PROGRAM OUTCOME (POs)

Engineering Graduates will be able to:

1. **Engineering Knowledge :** Apply the knowledge of mathematics, science, engineering fundamentals, and an engineering specialization to the solution of complex engineering problems.
2. **Problem Analysis:** Identify, formulate, review research literature, and analyze complex engineering problems reaching substantiated conclusions using first principles of mathematics, natural sciences, and engineering sciences.
3. **Design/development of solutions:** Design solutions for complex engineering problems and design system components or processes that meet the specified needs with appropriate consideration for the public health and safety, and the cultural, societal, and environmental considerations.
4. **Conduct investigations of complex problems:** Use research-based knowledge and research methods including design of experiments, analysis and interpretation of data, and synthesis of the information to provide valid conclusions.
5. **Modern tool usage:** Create, select, and apply appropriate techniques, resources, and modern engineering and IT tools including prediction and modeling to complex engineering activities with an understanding of the limitations.
6. **The engineer and society:** Apply reasoning informed by the contextual knowledge to assess societal, health, safety, legal and cultural issues and the consequent responsibilities relevant to the professional engineering practice.
7. **Environment and sustainability:** Understand the impact of the professional engineering solutions in societal and environmental contexts, and demonstrate the knowledge of, and need for sustainable development.
8. **Ethics:** Apply ethical principles and commit to professional ethics and responsibilities and norms of the engineering practice.
9. **Individual and team work:** Function effectively as an individual, and as a member or leader in diverse teams, and in multidisciplinary settings.
10. **Communication:** Communicate effectively on complex engineering activities with the engineering community and with society at large, such as, being able to comprehend and write effective reports and design documentation, make effective presentations, and give and receive clear instructions.
11. **Project management and finance:** Demonstrate knowledge and understanding of the engineering and management principles and apply these to one’s own work, as a member and leader in a team, to manage projects and in multidisciplinary environments.
12. **Life-long learning:** Recognize the need for, and have the preparation and ability to engage in independent and life-long learning in the broadest context of technological change.

(B) PROGRAM SPECIFIC OUTCOME (PSOs)

PSO1	Engineering Fundamentals: The ability to develop computer programs in the areas related to Algorithms, Multimedia, Web design, Big Data Analytics, and IoT to deliver a quality product for society needs.
PSO2	Career Development: The ability to excel in Computer Science and Engineering program through quality education, communication skills and ethics which enables them to succeed in computing industry profession.
PSO3	Problem Solving Skills: The ability to apply standard practices and strategies in software project development using open-ended programming environments to deliver a quality product for business success.

Declaration

The head of the institution needs to make a declaration as per the format given -

- I undertake that, the institution is well aware about the provisions in the NBA's accreditation manual concerned for this application, rules, regulations, notifications and NBA expert visit guidelines inforce as on date and the institutes hall fully abide by them.
- It is submitted that information provided in this Self Assessment Report is factually correct.
- I understand and agree that an appropriate disciplinary action against the Institute willbe initiated by the NBA. In case, any false statement/information is observed during pre-visit, visit, postvisit and subsequent to grant of accreditation.
